additional remark

Please carefully confirm whether the matching circuit mentioned in the report has been modified, and whether the environment has been treated Import, which will directly affect antenna performance.

The parameters provided in this report are only the parameters provided by the customer to our company for testing the prototype, and do not represent your company Final mass production status of the final project.

If your company has the latest trial production, or update the status (replace materials, update software, replace rings)

Please submit the prototype to our company for verification as soon as possible to confirm whether the antenna performance is affected.

If you need to send a third party retest or send a customer test, be sure to require testing The machine is sent to our company for testing and

confirmation, because the consistency of the motherboard, the consistency of the assembly, and the difference of the antenna assembly may lead to the deviation of the antenna parameters.

THANK YOU
