

MINIBOT

A Modular Reconfigurable Intelligent Robot System

Kit Introduction

Basic module

G module

T module

I module

F module

P module

M module

Fixed base

Orthogonal module

I Holder

Bionic foot module

Mecanum wheel

Flat wheel

Universal wheel

Serpentine wheel

External equipment

Ultrasonic

LED

Sound sensor

Color sensor

Infrared module

Control board

Camera module

Robot Controller

.....

Experimental Cases

Implemented Experiments

Applicable Majors

Undergraduate education	Robotic Engineering Automation Mechatronic Engineering Mechanical , manufacturing and automation Intelligent Manufacturing Engineering Artificial intelligence Intelligent Science and Technology
	Industrial robot Electrical automation Mechanical Manufacturing and Automation Mechatronics Computer Application Technology
Vocational education	

Experiment List

Control	Control of mechanical arm
	Control of wheeled mobile robot
	Control of bionic multi legged
AI	
	AI vision - color recognition
	AI vision - QR code recognition
	AI Vision - Face Recognition
	AI Vision Speech Recognition
	AI vision voice control
	AI Visual Voice Conversation
ROS	
	ROS-Simulation MiniBot
	ROS-Autonomous navigation
	ROS-Autonomous positioning
	ROS-Follow autonomously
	ROS-Sports Planning
	

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
