

## **MeowGo G40 Pro User Manual**

Copyright © 2025 uCloudlink All Rights Reserved

## 1. Product Overview

1. LCD Touch Display

2. Power Button

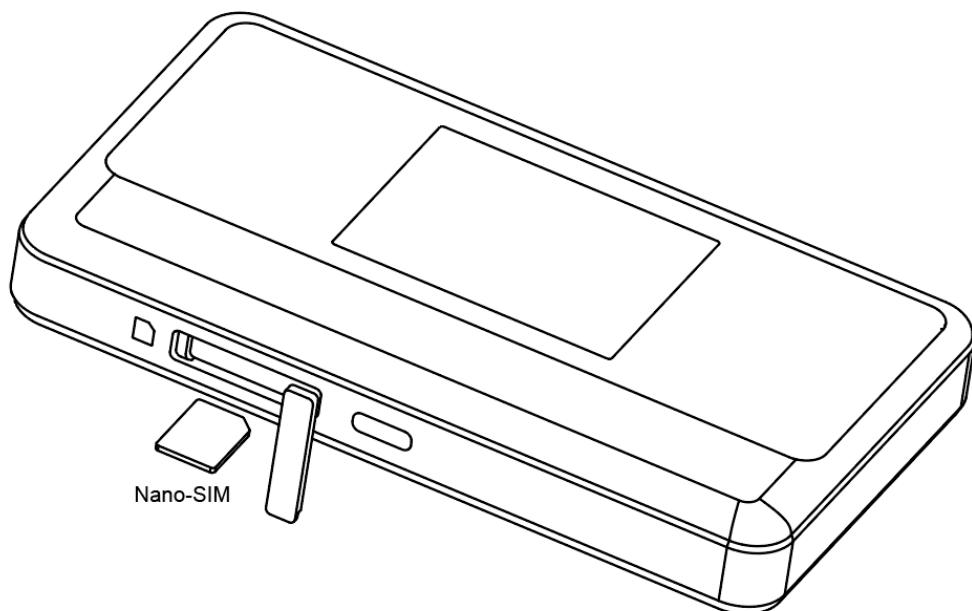

3. SIM Card Casse

4. Type-C(Input)

## Function Introduction

1. Power on: Press power button for 3 seconds.

2. Power off or Restart: Press power button for 3 seconds click select power off or restart on the screen

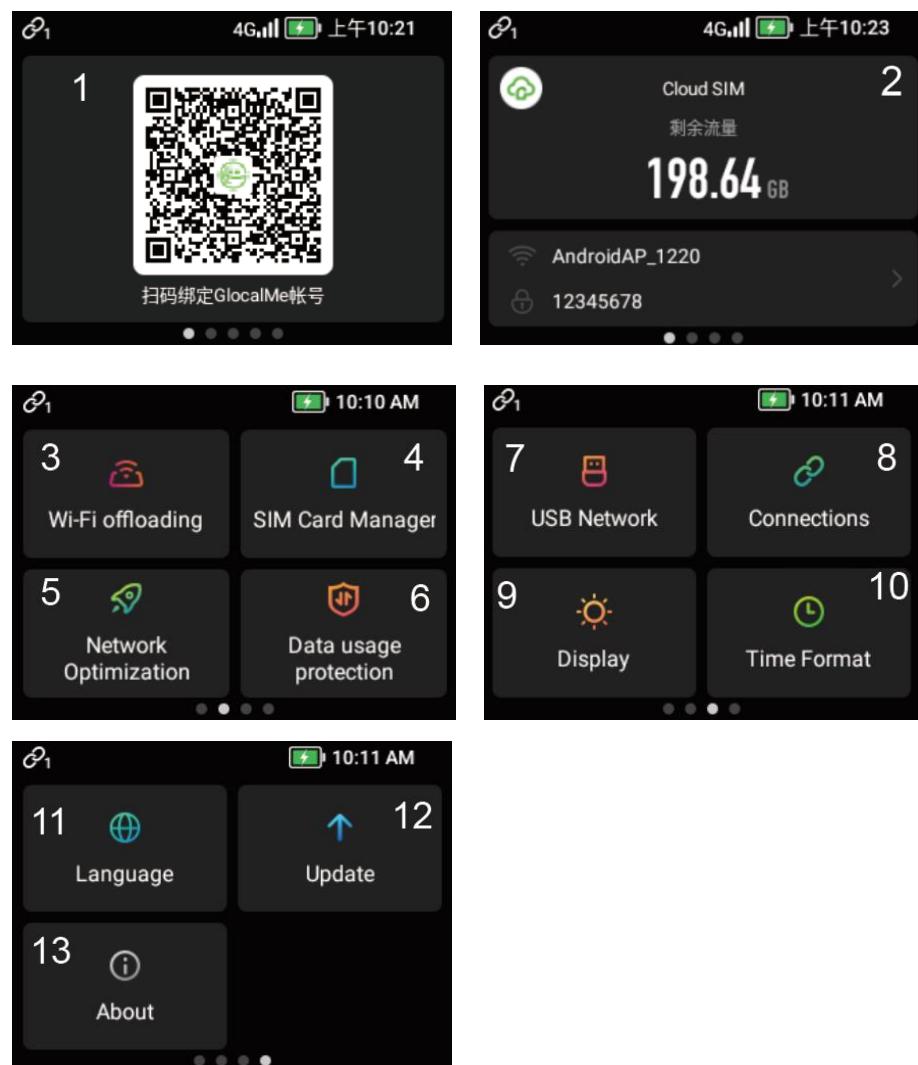

## Local SIM Guide

1. Local SIM is supported by MeowGo G40 Pro, only insert Nano-SIM card (small card).

2. Use a needle to pull out the SIM cards. Please contact customer service if any issue encountered.

## User Interface

1. QR code: For downloading Apps bind user account with the device.

2. Data usage SSID: Show data package usage, Wi-Fi name and Wi-Fi password.
3. Wi-Fi offloading: Turn on Wi-Fi offloading
4. SIM card manager: After user inserts one physical SIM card, user can select cloud SIM or physical SIM card to use data services, including the APN configuration of inserted physical card.
5. Network optimization: Click to optimize network and choose a better network.
5. Data usage protection: Turning on data usage protection function to prevent the data consumption from automatic App updates or automatic sync.
6. Data usage Protection: Data management. Enable this function to prevent massive data usage of:
7. USB tethering: Via USB port to share data flow from device to other connected terminals.
8. Wi-Fi client: Management of devices that access Wi-Fi.
9. Display luminance: Adjustable screen display brightness
10. Time Format: Time format setting
11. Language: Set the display Language
12. Update: Software Update
13. About: Display software version no, product IMEI, factory reset, etc

1. Power on: Press and hold the power button for 3 seconds until the device turns on. scan the QR code To bind the device

2. Sign up: To download the GlocalMe APP and sign up, use your phone to scan the QR code or search for “GlocalMe” in the APP Store. Notes: If you can't download iOS version after scanning, tap ... icon at the top right corner of the screen, and choose to open Safari to complete the download.
3. Bind device: Login to your GlocalMe account on the phone, go to My device > Bind device, and then scan the QR code on the screen.

Note:

1. Reboot your device after it is bound successfully.
2. Recharge your account on GlocalMe App as soon as possible before the initial data package runs out. There are various payment methods available, such as Alipay, PayPal, etc. For more information on topping up, visit the top-up page.

#### Technical Specification

Model: GLMU24A01

Box content: Device, User manual, Type-C cable

Size:115\*63.5\*14.8mm

Screen size: 2.0 inch

FDD-LTE: B1/2/3/4/5/7/8/12/13/17/18/19/20/25/26/28/66

TDD-LTE: B34/38/39/40/41(194M)

WCDMA: B1/2/3/4/5/6/8/9/19

Max upload speed: 150Mbps

Max download speed: 390Mbps (FDD) 300(TDD)

DL CAT13; UL CAT13

Wi-Fi: 2.4G or 5G; 802.11 a/b/g/n/ac

SIM Slot:1 x Nano SIM

USB port:Type-C

Battery capacity: 3200 mAh

Power input: : DC 5V/2A

Note:

Listed wireless data transfer rates are the theoretoical maximum. The actual data transfer rate may vary depending on the network environment and carrier's coverage.

#### CAUTION

A battery replaced by a battery of incorrect type, disposal by throwing into fire or a hot oven, or mechanically crushing or cutting can result in an explosion;

Leaving a battery in an extremely high temperature environment can result in an explosion or leakage of flammable liquid or gas;

A battery subject to extremely low air pressure may result in an explosion or leakage of flammable liquid or gas.

#### Warning

Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. The SAR limit is 1.6 watts per kilogram in countries that set the limit averaged over 1 gram of tissue and 2.0 watts per kilogram in countries that set the limit averaged over 10 grams of tissue. During testing, the device are set to their highest transmission levels in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

EU Regulatory conformance

The device complies with RF specifications and when used with an accessory that contains no metal and that positions the device a minimum of 0.5 cm from the body.

The SAR limit adopted is 2.0W/kg averaged over 10 grams of tissue. The highest SAR value reported for the device when properly worn on the body complies with the limit. Hereby, HONG KONG UCLOUDLINK NETWORK TECHNOLOGY LIMITED declares that this device is in compliance with the essential requirements and other relevant provisions of Directive (RED) 2014/53/EU.

#### **FCC Regulatory conformance**

For body worn operation, the device complies with FCC RF exposure guidelines and when used with an accessory that contains no metal and that positions the device a minimum of 1.0 cm from the body.

The SAR limit adopted by the FCC is 1.6W/kg averaged over 1 gram of tissue. The highest SAR value reported for the device when properly worn on the body complies with the limit.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause.

Undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and complies with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur during installation. If the device does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is suggested to try to correct the interference by the following measures:

- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and receiver.
- Connect the equipment to an outlet on a different circuit to the receiver.
- Consult the manufacturer or an experienced radio/TV technician for help.

Information on the disposal and recycling of the device

This symbol (with or without a solid bar) on the device, batteries (if included), and/or the packaging, indicates that the device and its electrical accessories (for example, a headset, adapter, or cable) and batteries should not be disposed of as household garbage. These items should not be disposed of as unsorted municipal waste and should be taken to a certified collection point for recycling or proper disposal. For detailed information about device or battery recycling, contact your local city office, household waste disposal service, or retail store.

Disposal of the device and batteries (if included) is subject to WEEE.

Directive Recast (Directive 2012/19/EU) and Battery Directive (Directive 2006/66/EC). The purpose of separating WEEE and batteries from other waste is to minimize the potential environmental impacts and human health risk of any hazardous substances that may be present.

Do not disassemble or modify, do not short-circuit, do not dispose in fire, do not expose to high temperature, be disable after soaking. Do not squeeze or bump the battery. Do not continue to

use if serious.
