Diagram illustrating the ARESNIX console with various ports and features labeled:

- Console connection
- LAN
- Extra power
- Power button
- Indicator light
- USB-Controller
- Keyboard/Mouse USB1
- Keyboard/Mouse USB2
- 3.5mm headphone jack

To connect with the P5

- 1 To play P5 game, please enable Remote Play on the console and activate P5 Mode in the app, following the prompts to complete the pairing.
- 2 How to enable Remote Play: Settings-System-Remote Play-Enable Remote Play.
- 3 Please note that the availability and functionality of Remote Play may vary depending on the region and network conditions. Make sure your devices and network meet the requirements and follow the instructions on the application and the console.

- 1 After connecting the Ethernet cable, the indicator light will flash rapidly in purple, indicating a successful network connection.
- 2 After completing the P5 mode pairing process in the app, the indicator light will stay solid purple, indicating a successful pairing.

- 1 Connect a wired original controller that matches your current console, and choose the Communication Method on the console side, Use USB Cable.
- 2 If you previously switched the device mode to P5 Mode within the app, you need to switch it back to Universal Mode.

The indicator light staying solid blue indicates successful pairing with a PS console, The indicator light staying solid green indicates successful pairing with an Xbox console.

You need to turn on the Pro Controller Wired Communication in the system settings - Controllers and Sensors.

The continuous solid red light indicates a successful pairing with the NS console.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This device generates, uses, and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.
Increase the separation between the device and receiver.
Connect the device into an outlet or circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
