Bluetooth headset manual

- Support caller ID reporting
- Single or dual TWS

Wireless pairing:

1: Connection: Press the power button for 4 seconds, then release the button to see the red and blue lights flashing alternately. At this time, turn on the wireless phone to find the pairing number connection, which can also

support other wireless connections. After successful connection, you can listen to music or make phone calls.

Voice switching:

After turning on the phone, press the headphone button four times before pairing to switch between Chinese and English voice.

Voice Assistant:

When connected to the phone, press the power button for 1 second to activate the language assistant function, which is compatible with Android and Apple.

FCC Warning Statement:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These

limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to

correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following

two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Binaural TWS pairing operation

When two earphones are turned on at the same time and you hear the "pairing" prompt, quickly double-click the power button on one of the earphones. After 3 seconds, it will automatically pair into a dual ear TWS function, and click to connect and pair successfully.

To have this feature, you need to purchase two headphones

Not supporting power bank and 2A fast charging for earphones may damage the earphones.
