1 Precautions

Thank you for choosing the GEARELEC GH01 Bluetooth Helmet! To ensure the best possible experience, we recommend thoroughly reading the manual before use. Familiarizing yourself with the instructions will help you maximize its features and functionality while ensuring safe and effective use.

- After receiving the helmet, fully charge the taillight before turning it on.
- Please turn off the taillight when charging or not in use.
- Replace the visor of your helmet periodically to ensure the security.
- When driving any motorcycle, always wear the helmet properly fastened in order to fully exploit its protection.

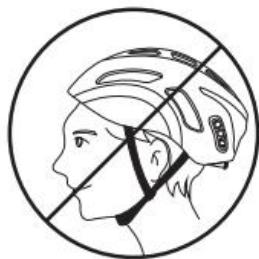

2 Product Overview

The GEARELEC GH01 Bluetooth Helmet not only protects your safety while riding but also supports Bluetooth pairing with your phone, allowing you to listen to music and make phone calls, bringing you a new riding experience.

Model	GH01
Bluetooth Version	5.3
Bluetooth Range	32.8 ft (10 m)
Battery Capacity	1500 mAh
Power Input	DC 5 V, 1 A (not included)
Charging Time	2 h
Standby Time	40 h
Music Time	15 h
Call Time	35 h
Lighting Time	30 h
Waterproof Level	IPX5

3 Wearing Method

Wrong

Wrong

Right

- Ensure the helmet is centered on your head. Do not position it too far forward or backward.
- Adjust the size adjuster to fit your head circumference.
- Adjust the chin straps on both sides of the helmet so that the strap adjustments are located under your ears.
- Fasten the quick-release buckle until it is snug.
- Put the visor down while riding to protect your eyes.

4 Operation Instructions

4.1 Basic Functions

Charging the Taillight: Insert the supplied USB Type-C charging cable into the charging port and connect it to any of the following power sources:

- DC 5V/1A power supply.
- USB output port on your PC, power bank, or other devices.

The indicator illuminates red while charging and green once fully charged.

Power ON: Press and hold the **Taillight** button for 3 seconds. The taillight will turn on, and the indicator light will remain red.

Turn on/off Taillight (when powered on): After the taillight is on, press and hold the **Taillight** button for 2 seconds to turn it off. Press and hold the **Taillight** button for 2 seconds again to turn the taillight back on.

Power OFF: After the taillight is on, press and hold the **Taillight** button for 5 seconds to turn it off completely.

4.2 Pairing with a Phone

Pairing with a Phone: After the taillight is turned on, enable Bluetooth on your phone, then search for and select the device named “GEARELEC Helmet.” The indicator will flash red once paired.

Activating Voice Assistant: Upon pairing with your phone via Bluetooth, press the **Taillight** button three times to activate the voice assistant.

4.3 Phone Function

Answer a Phone: When the taillight is paired with your phone and a call comes in, it will announce the phone number of the incoming call. You can press the **Taillight** button to answer the call.

Hang Up: Press the **Taillight** button during a call to end it.

Reject a Call: When the taillight is paired with your phone and a call comes in, double-press the **Taillight** button to reject the call.

Redial the Last Number Called: When the taillight is paired with your phone or when music is playing, double-press the **Taillight** button to redial the last number called.

4.4 Music Function

Play Music: After pairing the taillight with your phone, open a music player on your phone, then press the **Taillight** button to play music.

Pause Music: While music is playing, press the **Taillight** button to pause music.

5 Care and Maintenance

Helmet Care

- Ensure that your helmet outer shell does not come in contact with any petroleum/gasoline product.
- Do not hang your helmet on the mirror/handle bar of the two-wheeler.
- Do not repaint your helmet. Repainting of helmet can reduce impact absorption capacity.
- Do not replace the visor with dark or tinted ones in poor visibility conditions.
- Do not modify your helmet by drilling holes in the outer shell.
- Do not store your motorcycle gloves in your helmet when you are off bike. Your gloves are likely to have traces of gasoline on them which can ruin your helmet interior.

Exterior Cleaning

- Use very little pressure when cleaning off the helmet shell and visor. Otherwise, you would leave scratches on the exterior.
- Before wiping the helmet, use a moist cloth to clean off the dirt and bugs.
- Do not use harsh chemicals to clean your helmet. Always use soap and water.

Interior Cleaning

- Use mild soap and warm water to gently wash the liner. Avoid using a washing machine as it can be too rough.
- If raindrops accidentally enter the helmet, let the liner air dry completely before putting the helmet back in.

Storage Tips

- Store your helmet in a cool, dry place. Extreme heat or cold can damage it.
- Avoid storing your helmet near fuel, cleaning fluids or excessive heat.
- Use a helmet bag to protect your helmet from dust and scratches when you are not using it.

NOTE: This equipment has been tested and found to comply with the limits for Class B digital devices, in alignment with section 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Disposal of Electrical and Electronic Equipment

The crossed-out garbage can means that you are legally obliged to dispose of these devices separately from unsorted municipal waste. Disposal via the residual waste bin or the yellow bin is prohibited. If the products contain batteries or rechargeable batteries that are not permanently installed, they must be removed before disposal and disposed of separately as a battery.

Options for Returning Old Devices (EAR)

Owners of old devices can hand them over within the scope of the options for returning or collecting old devices that have been set up and made available by public waste disposal authorities, so that proper disposal of the old devices is ensured.

Options for Returning Old Devices (EAR)

Owners of old devices can hand them over within the scope of the options for returning or collecting old devices that have been set up and made available by public waste disposal authorities, so that proper disposal of the old devices is ensured.

Declaration of Conformity

Shenzhen Xincheng Times Technology Co., Ltd. hereby declares that the device complies with the legal regulations of the EU Directives 2014/35/EU and 2011/65/EU (RoHS).
