Please keep the implanted medical device(pacemaker, implantable cochlea, etc.) at least 20cm directly away from the product to avoid potential interference with the medical device. 4. Always keep this device dry and do not clean it with chemical agents. 5. Do not crash, avoid dropping, disassemble, impale or put this device into humid conditions. 6.Avoid extreme temperatures 7.Do not use it to charge devices with incompatible current and voltage, which cause fire or other problems. 8.The heating caused by wireless charging is a normal phenomenon(the ambient temperature will also affect the heating).</div>	<div>FAQ</div> <div>When it's not charging for this device: . Please check the cable, charger or adapter used are working. . If not, please choose compatible components to charge it. When it's not charging for the phone: . Please make sure the power is on and the is power left in this device.</div>	<div>FCC statement: This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on , the user is encouraged to try to correct the interference by one or more of the following measures: --Reorient or relocate the receiving antenna. --Increase the separation between the equipment and receiver. --Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. --Consult the dealer or an experienced radio/TV technician for help. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Radiation Exposure Statement This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 0 cm surrounding the device and 0 cm above the top surface of the device must be respected.</div>
