SAFETY INSTRUCTION

- Don't place the product near heating equipment
- Don't disassemble or repair the product without authorization.
- When not in use, please unplug the product charger from the socket to avoid draining battery life or causing damage.

CHARGING YOUR DEVICE

1. Connect the device to a USB power source.
2. Use the cable that came with the device.
3. Charging time is approximately 2-3 hours.
4. Disconnect the device when fully charged.
5. The red light will stay on during the charging phase and will turn off when the device is fully charged.

FAQ

- Q: Can the phone holder support a tablet?**
A: This phone stand with wireless speaker is mainly designed for mobile phones. A tablet may be too heavy for this holder.
- Q: Why does the speaker's power run out so quickly?**
A: Before the first use, we recommend fully charging the device using the original cable, which takes about 2 to 3 hours.
- Q: Is this speaker available via the USB-C port on the back, not just BT?**
A: The audio transmission is only available via BT, and the USB-C port on the back is only for device charging.
- Q: Why can't the second device pair with the BT Speaker?**
A: When using two devices with the same BT speaker, you need to switch off the BT function of the first device before connecting the second one. This will ensure that the second device can properly connect and function with the speaker.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
 This device complies with part15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
 The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
