

3-in-1

Magnetic Wireless Charger User Manual

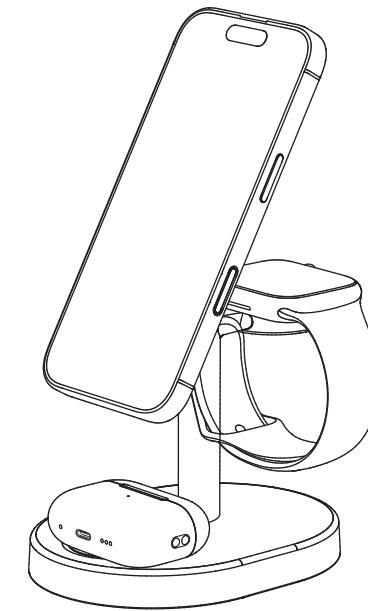

Product Introduction

Highly Recommended

Charging Positions

Charging 3 devices at the same time.

Attentions

- Please keep the charger away from water or other liquids.
- Please do not pull the silicone connect strip, which will easily damage the precision components under it.
- Don't place the charger too close to any metal or magnetic stripe or chip card (ID card, bank cards, etc.) during charging.
- The wireless charging induction distance is 3-6mm, we recommend taking off your unique phone case over 3mm thick or using MagSafe/Magnetic case to bring you a better charging experience.
- We recommend that you close the high power consuming software to effectively prevent the phone from overheating before charging.
- The watch has temperature control, when the temperature reaches 104°F, the charger will stop charging automatically and continue to charge after the temperature cool down to normal.

Trouble Shooting

- Update the device to the latest system.
- Make sure your device that supports wireless charging.
- Make sure to use the original charging cable and adapter.
- Avoid too thick device covers.
- Avoid high ambient temperature, optimal temperature is 82-86°F.
- When the phone or watch cannot be fully charged, try the following: Open[Settings]-[Battery Health]-[Turn off battery optimization].
- When the earphones are exhausted and cannot be charged, please take out the earphones and charge the storage compartment separately.

FCC warning:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
