

CarPlay

operation instructions

Wireless Carplay Operation Steps

1、 Insert the box into the USB interface of the original vehicle for data transmission
The original car needs to support CarPlay connectivity function

2、 Click on the CarPlay function icon on the car's infotainment screen
The car's infotainment system recognizes the box, and the CarPlay icon will light up

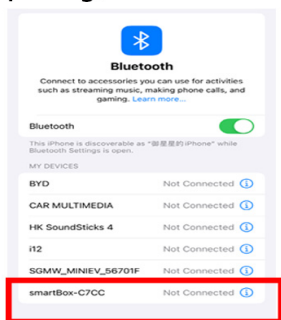

3、 Apple phone pairing with in car connectivity system
After entering the CarPlay pairing page, use iPhone to collect and pair

Wireless CarPlay pairing process special note

- Before pairing the box for use, please ignore the pairing with the original car's Bluetooth to avoid interference (note to ignore! Not disconnect!)
- Please use your iPhone for Bluetooth pairing. Turn on your phone's Bluetooth and WiFi in advance, search for the Bluetooth name "***** Box_ * * *" on the car's screen for pairing, and follow the iPhone prompts to connect

Search for the Bluetooth name
"**** Box_ ****" on the car
screen for pairing on iPhone

Click Allow

Click Allow

Keep clicking on 'allow' or 'pair'
to successfully connect and use

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
