Step9:Enter the corresponding wifi password

After enter ing the password, connect to comp lete the instal lation

Select AP mode for instal lation. One end of the Ethernet cable needs to be connected to the router's Ethernet port, and the other end needs to be connected to the WiFi repeater's LAN port

Frequently asked questions

1.Why is the signal indicator not lit,what should I do if it doesn't light up?

There are two reasons why the signal indicator does not light up after instal lation. 1. The signal from the router is too weak; 2. The corresponding wifi password i swrong (pay attention to the case of letters);

Step1: Open the phone settings page and find the WiFi list option

Step2: Tap on the name of the WiFi with Repeater-xxxx

Step3:Select the language and click Login

Step4: Select Repeater Mode Settings

Step1:Open the phone settings page and find the WiFi list option

Step2:Tap on the name of the WiFi with Repeater-xxxx

Step3:Select the language and click Login

Step4:Select AP Mode Settings

2.Whereto put the WiFi repeater?

IF you can receive two or three stable Wi-Fi signale from your router,you can find a reasonable placement according to the signal strength of the repeater

3. How far can the signal spread?

It can be expanded to about 60~120 square meters,and there are different signal interference in different environments,which is subject to the actual situation

4. What is a password?Can I change my password? can I change my name?

It is your own home wifi password or the corresponding wifi password,the wifi password can only follow the router wifi password,and cannot be changed in the repeater.

5. What should I do if I don't use the original router in a new environment?

Reset the machine and reinstall it

Step5: Please choose your own home WiFi and make sure you have a stable WiFi signa

Step7:Remember your name adn password,and click Done

Step6:Enter the password of the corresponding WiFi, and check the option to change the name of the extension

Step8:Exit the instal lation page directly and wait for three minutes

Instal lation diagram

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
