Troubleshooting

· I heard the sound of [Kaka]?
Because the protocol distance of Bluetooth is empty, it can reach 10M in the case of barrier-free. Among them, the human body is always the biggest interference obstacle Bluetooth for headsets. We recommend that you wear the headphones on the same side of the mobile phone to achieve the best results.

· The phone is not connected to the headset?
1. Please make sure the Bluetooth headset is turned on.
2. Please make sure the Bluetooth of the mobile phone is in the search state.
3. Please make sure that the Bluetooth headset is not connected to other mobile phones.
· If the above steps did not resolve the issue, please try the following:
A. Recharge the headset and automatically reset the headset.
B, restart the phone
C. Start the Bluetooth function of the mobile phone and delete the previous pairing history.
D. Reconnect the Bluetooth headset to your phone.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
