RE: 60GHz Radio External Phase Locking Input (FCC ID: 2BBSF-SC11-AAB)

To Whom It May Concern,

The Dense Air STC-v11-Node-n77, Model: AAB product is in compliance with Part 15.255(h), the STC-v11-Node-n77, Model: AAB does not have an external phase locking input.

The 60GHz radio modules do not support an external phase lock input and do not support beam forming across multiple radio modules.

Yours Faithfully,
