Customer EAN: 6975971299262

## Sticker barcode encoding requirements

SN: Import barcodes from EXCL tables. Barcodes need to be generated by suppliers and can be scanned.

### II. Notes

1. Orders are compiled by production month.
2. For orders of the same model placed on different dates and produced in the same month, please compile the serial number based on the previous order. If produced in different months, the serial number starts from 1.
3. This serial number needs to be synchronized with the outer box, color box, and product.
