Charging instructions

Using magnetic charging mode, support computer USB or mobile phone 5V standard charger, as shown in the following figure:

Tips:

Please use a charger that meets international safety standards for charging, other chargers can charge, there may be problems such as slow charging, heating, etc., please use with caution. The magnetic suction charging head contains a magnet inside, which prohibits long-term contact with high temperatures, and demagnetization may occur.

Pair the connection

1. Use the mobile phone to download the APP "CO-HI" to the mobile phone and install, two ways:
 - 1) iOS/Android mobile phone users: Scan the right two-dimensional code through the mobile phone browser, or scan it with WeChat. After opening the interface <=, select Android/iOS in the interface and then use your phone's browser to open the download.
 - 2) If the watch starts up for the first time or recovers After the factory starts the watch, before entering the main interface, The QR code will be displayed and scanned through a mobile browser or via WeChat Scan, open the interface, and then use the mobile browser to open the download.

Tips:

The mobile phone system requires Android 5.1 (inclusive) or above, iOS 9.0 (inclusive) or above. The permissions during the installation process require all the optional consent, otherwise it may affect the use of the function.

2. connect Bluetooth, first open "YouPro APP" and open the phone Bluetooth, "YouPro APP" will have a notification prompt to enable, click "OK" Click "Scan Device" on the APP device page, search for the Bluetooth address or Bluetooth name of the watch, select and connect.

Tips:

Some Android mobile phone systems need to open the mobile phone GPS to search for the Bluetooth name of the watch.

Main Function Introduction:

- 1 Phone dialing: connect to call Bluetooth, dial from the watch, you can make a call on the watch side; there are contacts and call records in the dial interface, and frequently used contacts need to add settings in the APP.
- 2 Message: This function needs to be connected to the "HiFlash" app on the mobile phone to query the third-party program messages that set the message notification.
- 3 Sleep monitoring: It will record your sleep duration and quality from 9 o'clock every night to 9 o'clock the next morning to help you better adjust your work and rest time and improve sleep quality.
- 4 Heart rate monitoring: Wear a watch, the best place to wear it is the wrist bone above the arm, you can monitor the real-time heart rate value, the normal value of the average person is 60-90 beats /min. Click start on the heart rate interface, the value will be measured after about 20-30 seconds, and the detection will stop after 60 seconds, and the value will be the heart rate value when the detection was stopped.
- 5 Blood pressure: When testing, please lay your hands flat, the blood pressure value will be displayed within one minute.
- 6 Blood oxygen: enter the blood oxygen function, press start to enter the test, the normal blood oxygen saturation is about 94-99%.
- 7 Outdoor sports: a variety of outdoor sports, you can monitor your exercise.
- 8 Indoor exercise: A variety of indoor exercises can monitor your exercise data more accurately. At the same time, the heart rate monitoring will be turned on, and the motion of stopping or pausing can be set on the exercise mode interface.
- 9 Bluetooth camera: You need to enter the camera function in the APP, shake the watch back and forth several times to remotely control the camera.
- 10 Bluetooth music: After connecting and calling Bluetooth, you can play/control the music in the phone.
- 11 Weather: After connecting the mobile phone to synchronize data, you can check the weather of the day.
- 12 Settings: Carry out various local settings of this machine, including brightness, rest screen duration, hand up on screen, do not disturb mode, sound and vibration, language switching, mobile phone QR code connection, watch password, shutdown, factory reset, the machine information etc.

Warm tips: If the WeChat desktop version is online at the same time, the mobile phone terminal will not receive the letter notification. Some mobile phones also need to add "YouPro APP" to the power-saving whitelist to avoid being turned off by the phone when the battery is low.
