Packing List

Smart watch × 1
Charging cable × 1
Instructions × 1

Basic Parameters

Product Name	Smart Watch
Product Model	ALW47G
Input	5V = 0.2A
Battery	420mAh
Water Resistance Rating	IP68
Maximum Operating Temperature	45°C (113°F)

About the Watch

Power button

When the watch is off, press and hold this button to power on the watch.
When the watch is on, press and hold this button to power off the watch.
When the display interface is watch face, press this button to open the watch's app menu.

UI touch

Slide left or right the interface to view the shortcut card or sidebar.
When the display interface is watch face, slide it down to view the notification panel.
When the display interface is watch face, slide it up to open the control center.

LIGHT

Press this button to light up or turn off the screen.

SPORT

Press this button to quickly enter the workout page.

Notes:

- 1) For first use, please charge up the watch to activate it.
- 2) If the watch cannot be powered on, please charge it up, and then have another try.

How to Pair the Watch

1. Please scan the QR code on the right side using your phone; then download anyloop and install it. Alternatively, search anyloop from Google Play or App Store; then download the latest version of anyloop and install it.
2. Ensure your phone's Bluetooth is on.
3. Open anyloop. Log on or register your account as the app instructs (or enter the visitor mode).
4. Click "Add a device", and select the device to pair. Give the app related permission as the tooltip prompts.
5. Click the watch's Bluetooth name to make pairing.
6. A pairing code will be displayed on your watch. Enter that code on your phone. Once pairing succeeds, the watch will go to watch face automatically.
7. To assure the availability of the watch's function Phone Call, please accept the Bluetooth pairing request on the watch. Otherwise, functions Phone Call and Voice Assistant will be unavailable.

Notes:

- 1) During pairing, please confirm your phone's Bluetooth is on, and ensure the watch is being connected to your phone.
- 2) If the watch cannot be searched during device adding, or if the watch cannot be connected at use, please reset/reboot it, and then have another try.
- 3) Once pairing achieves success, please protect the app backstage from being accidentally closed by the system as the app guides. Otherwise, there may be a result that the watch is disconnected from your phone, affecting the watch to operate as normal.
- 4) For better user experience, please use the latest version of app.
- 5) The operating system should be above Android 5.0 or iOS 9.0.

How to Wear the Watch

1. Wear the watch properly, neither too tight nor too loose, to allow your skin to breathe. In that way, you could feel comfortable, and the sensor could operate normally.
2. For accurate measurement, please keep your arm level and still, and keep your skin comfortable by leaving a room for a finger between watch and skin.
3. You could tighten the watch band during exercise and loosen it after exercise.
4. The tattoo, mark, and hair on your wrist where the watch is worn may affect the heart rate sensor. For this reason, please wear the watch on a wrist that will not disturb its function.

Notes:

- 1) Once the watch band is well fit, please full it appropriately to check whether it's secure or not.
- 2) If you want to buy a watch band, please go to the anyloop store.
- 3) If the watch band appears to have breakage, please contact Support@any-loop.com for renewal.

Main Functions

Heart rate

1. Click "Heart rate" on the watch's menu.
2. The watch will begin to measure your heart rate automatically.
3. Wait about 10 seconds, and then you could view the measured heart rate.
4. Slide up or down the interface to view other information on heart rate. You could turn on Bluetooth, synchronize the information on heart rate with the app, and view further data of heart rate.

SpO2

1. Click "SpO2" on the watch's menu.
2. The watch will begin to measure your SpO2 automatically.
3. Wait about 10 seconds, and then you could view the measured SpO2. You could turn on Bluetooth, synchronize the information on SpO2 with the app, and view further data of SpO2.

Sleep

1. Sleep with the watch on, and it will begin to measure your sleep automatically.
2. When you wake up, click "Sleep" on the watch's menu, and then you could view the information on sleep for the previous night.
3. You could turn on Bluetooth, synchronize the information on sleep with the app, and view further data of sleep.

Workout

1. Click "Workout" on the watch's menu.
2. Slide up or down the interface to select the desired exercise.
3. The watch will begin to record your exercise data automatically in 3 seconds. Slide up or down the interface to view heart rate, distance, time, etc.
4. Slide right the interface to go back to or finish exercise.
5. You could turn on Bluetooth, synchronize the information on exercise with the app, and view further data of exercise from the plate Exercise on Homepage.
6. In workout mode, your heart rate will be measured on a real-time basis.

Message Notification

1. When the watch is connected to your phone via Bluetooth, the watch could receive messages from your phone's notification center.
2. When the display interface is watch face, slide it down to open the notification panel, and then the message notifications could be viewed.

Weather

1. Turn on Bluetooth. Ensure the watch is connected to your phone.
2. Open anyloop.
3. Click "More Settings" on Device page.
4. Find the app plate, and turn on "Weather".
5. Open the watch's menu. Click "Weather" to view the information on local weather.

Watch face

1. Press and hold watch face to enter "Edit" interface. Slide left or right the interface, and then select the desired dial.
2. Turn on Bluetooth. Ensure the watch is connected to your phone. You could open anyloop and select more dials from Dials Shop.
3. Alternatively, you could upload a picture to generate a user-defined dial.

How to make a phone call

1. Turn on Bluetooth. Ensure the watch is connected to your phone.
2. Click "Call" on the app menu.
3. Enter a number by using the keypad, and then click the icon Call.

How to answer a phone call

1. Turn on Bluetooth. Ensure the watch is connected to your phone.
2. When there is an incoming call, click the (📞) to answer that incoming call. You could use the watch's built-in microphone and speaker. Click the icon microphone (📞) to turn off the microphone. Click the (📞) to reject that incoming call.

How to charge up the watch

1. Wire the charging cable to the power adapter or your computer's USB interface.
2. Make the charging port tight aligned with the charging contacts on the watch's back.
3. During charging, you could view the charging status on the screen.
4. When the watch is fully charged, please disconnect it from the wireless charger.

Notes:

- 1) Please use the charging cable in the package.
- 2) Before charging, please ensure the charging part is dry, clean, free of foreign matter such as sweat, liquid, dust, and so on.
- 3) If the product is long laid aside, it's advisable to power off the product before you put it aside. That product on the shelf shall be fully charged once six months to prevent its battery from being excessively discharged or even being damaged.
- 4) If the watch cannot be charged, please contact Support@any-loop.com.

Attaching and removing the band

Please follow the graphical presentation to take off or fit the watch band.

Notes:

When you are fitting or renewing the watch band, please take care not to hurt your fingernail.

1. Insert the needle of watch band to the hole.
2. Toggle the lifting lever of watch band and push it into the slot for fixing.
3. Pull the watch band gently after finishing assembly to ensure it will not drop.
4. Toggle the lifting lever of watch band to take down the watch band.

Matters Needing Attention

1. This product, not a medical apparatus, shall not substitute for professional medical diagnosis. Its design or intention is not for diagnosing diseases and other symptoms or for curing, relieving, treating, or preventing any symptom or disease. Before making any decision on your health, please seek advice from your medical service provider.

2. Do not try to replace the battery yourself. Do not drop, incinerate, puncture or crush the battery as this may cause the battery to catch fire or explode.
3. Keep away this product from over-temperature and under-temperature conditions. Otherwise, it may catch fire or explode.
4. anyloop has internal and external certification agencies do harmful material testing for the watch, covering all materials in contact with skin, dermatologic toxicity, and wearing. Some people may show skin allergies to vinyl leather, fiber, etc., and they will show symptoms such as erythema and inflammation after long contact with this product. If you have such symptoms, please stop using the product right away, and seek advice from your doctor.
5. Please don't use an unauthorized/incompatible power charger or data cable. Otherwise, there may be a result that the watch is damaged, catches fire, explodes, or leads to other dangers.
6. Radio waves from this product probably affect availability of implantable/personal medical apparatuses such as cardiac pacemaker and hearing aid.
7. Please don't dispose this product and its accessories as general household garbage. Please ensure you dispose or recycle this product and its accessories by local laws and regulations.

Repair & Maintenance

1. Avoid using liquid soap, hand sanitizer, body wash, washing liquid, and other cleansers to clean the watch. Residual liquid soap, detergent, hand sanitizer, or cleanser remaining on the watch may induce irritation to your skin or might bring down the watch's waterproof performance.
2. Please don't wear the watch in underwater sports like snorkeling, diving, or scuba diving, in aquatic sports like water skiing or surfing, and in swimming in such environment of high hydraulic pressure as river. In those environments, hydraulic pressure will vary suddenly, causing change to the watch's waterproof performance.
3. The watch's waterproof performance may be impaired because of acute change to air/water temperature. For this reason, please don't wear the watch in high-temperature environments such as sauna room and hot water bath.
4. You could use the watch in exercise, in hand washing, or in rain.
5. Keep the watch dry, away from damp. Do not long expose the watch to direct sunlight. Both over-temperature and under-temperature may result in the watch's breakdown.
6. Please don't wear the watch in MRI examination or in other highly magnetic environments. Otherwise, the watch may be damaged.

Customer Service

If you have any questions or doubts, please contact our customer support team at support@anyloop.com. We wish you would love your new smart watch.

FCC & IC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction. L'appareil a été évalué pour répondre aux exigences générales en matière d'exposition aux RF. L'appareil peut être utilisé dans des conditions d'exposition portables sans restriction.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:
This device may not cause interference.
This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:
L'appareil ne doit pas produire de brouillage;
L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Due to the limitation of product size, the product certification information is printed on the outerpackage, please see as below:
FCC ID: 2BBVM-ALW47G
IC: 31734-ALW47G
