

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. The top half shows the green printed circuit board (PCB) with various electronic components, including a circular component in the center. The bottom half shows the black plastic housing with internal mounting points and a central cross-shaped structure. A black ruler with white markings is placed horizontally below the components for scale.
EUT Housing and Board View 2	 A photograph showing the internal components of an EUT housing from a different angle. The top half shows the black plastic housing with a white circular component and a black cable. The bottom half shows the green PCB with a circular component. A black ruler with white markings is placed horizontally below the components for scale.

EUT Housing and Board View 3	 A photograph showing the EUT housing and board from a top-down perspective. The housing is black plastic with a circular opening in the center. A small white circular component is placed next to it. A black cable with a green and white braided shield is connected to the housing. A black ruler with white markings is placed below the components for scale.
Solder Board-Component View 1	 A photograph showing the solder board component from a top-down perspective. The board is green with a central circular area covered in a dark, textured material. A small black component is visible on the right side of the board. A black ruler with white markings is placed below the board for scale.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) assembly. A large, circular, silver-colored component, likely a coil or inductor, is mounted in the center. To the left of this component is a small integrated circuit (IC) and several other smaller components. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters. The background is a blue textured surface.
Solder Board-Component View 3	 A close-up photograph of a green PCB assembly. A large, square, silver-colored component, likely a capacitor, is mounted on the left side and is labeled "4R7". To its right is a large, black integrated circuit (IC) with many pins. The PCB has various traces and other smaller components. The background is a blue textured surface.

Solder Board-Component View 4	 A photograph showing two circular electronic components, likely sensors or cameras, lying on a blue textured surface. A black ruler with white markings is placed horizontally below the components. The ruler has two scales: the top scale is in centimeters (0 to 100) and the bottom scale is in millimeters (0 to 100). The components are connected by a thin black wire. The component on the left has a visible circuit board with various components, while the one on the right is mostly black with a circular lens area.
Solder Board-Component View 5	 A photograph showing a single electronic component, a circuit board, lying on a blue textured surface. A black ruler with white markings is placed horizontally below the component. The ruler has two scales: the top scale is in centimeters (0 to 90) and the bottom scale is in millimeters (0 to 60). The component is a rectangular circuit board with various components, including a large blue chip and a smaller black chip. It is connected to a black cable with a red and black wire. The component is labeled with "3R3 111 2SK" and "WALTEK-01".

Solder Board-Component View 6	 A photograph of a small, rectangular electronic component with a black solder mask and numerous gold-colored solder points. The component is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The component's width is approximately 25 mm and its height is approximately 15 mm. A thin black wire is attached to the right side of the component.
Solder Board-Component View 7	 A photograph of a circular electronic component with a copper-colored rim and a black center. The component is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The component's diameter is approximately 25 mm. A small, rectangular electronic component is attached to the left side of the circular component.

Solder Board-Component View 8	 A photograph showing a small electronic component, likely a solder joint, placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements from 0 to 70 mm. The component itself is dark and irregularly shaped, with a small, lighter-colored circular feature in the center.
Antenna View 1	Output 1 Coil Antenna  A photograph showing a circular antenna component, labeled "Output 1 Coil Antenna", resting on a blue textured surface. The antenna has a central black circular area surrounded by concentric copper-colored rings. A black cable is attached to the left side of the antenna. A red rectangular box highlights the central black area, and a red line points from the label "Output 1 Coil Antenna" to this area.

Antenna View 2	Output 2 Coil Antenna 
Antenna View 3	Output 3 Coil Antenna
