Setting Up Your iPhone

Compatibility

The Wallet is only compatible with iPhone 12 series or later phones running iOS 14.5 or later with Two-Factor Authentication turned on.

1. Turn on Two-Factor Authentication for your Apple ID

On your iPhone: Go to **Settings** > your name > **Password & Security**. Tap **Turn On Two-Factor Authentication**. Then tap **Continue** and follow the onscreen instructions.

On your Mac: choose Apple menu > **System Settings** (or **System Preferences**), then click on your name (or Apple ID). Click **Password & Security**. Next to **Two-factor Authentication**, click **Turn On** and follow the onscreen instructions.

On the web: Go to appleid.apple.com and sign in using your Apple ID. Answer your security questions, then tap **Continue**. Tap **Continue** when you see a prompt to update account security. Then tap **Update Account Security** and follow the onscreen instructions.

2. Turn on Find My

A. Go to **Settings**.

B. Tap your name, then tap **Find My**.

C. Tap **Find My iPhone** and turn on **Find My iPhone**.

3. Turn on Bluetooth

4. Connect to a stable Wi-Fi or cellular network

5. Turn on Location Services

Go to **Settings** > **Privacy & Security** > **Location Services** > turn on **Location Services**.

Getting Started

Power on

Short press the Wallet's power button **once**, and a beep will sound to indicate that it is turned on.

Power off

To power off, short press the power button **twice**, then **long press** the power button; When you hear a beep, it indicates that your "wallet" has been turned off. If your Wallet is not paired within 10 minutes, you will hear a beep and it will automatically power off. Power on to continue pairing.

Play sound alert

Open the Find My app. Tap the **Items** tab. Select your Wallet in the **Items** list and tap **Play Sound**.

Factory reset

To reset, short press the power button **4 times**, then **long press** the power button until you hear a beep, it indicates the factory reset has been completed.

Set up Notify When Left Behind

If your Wallet is not in Bluetooth range of your iPhone for a period of time, you will receive a notification that your Wallet has been lost (if you set up a name, the name will be displayed, otherwise it will show Wallet).

Pairing Your Wallet

1. Ensure your iPhone is set up (see "Setting Up Your iPhone" above) and your Wallet is powered on. 2. Open the Find My app. 3. In the **Items** tab, tap **Add New Item**.

4. Tap **Other Supported Item** (your iPhone will search for your Wallet).

5. Once your Wallet is detected, tap **Connect**.

6. Follow the onscreen steps to name it and register it to your Apple ID.

7. Ensure your Wallet appears in **Items**. If not, forget the device, perform a factory reset on the Wallet (see "Getting Started > Factory reset" above), then reconnect.

* Do not leave Find My app while pairing Wallet.

1. Open the Find My app.

2. Tap the **Items** tab.

3. Select your Wallet in the **Items** list and scroll down.

4. Under **Notifications**, tap **Notify When Left Behind** and turn on.

6. Charging indicator light

• Charging: Orange light

• Full charging: Green light

Locating Your Wallet

Locate your Wallet via the map

1. Open the Find My app. 2. Select your Wallet in the **Items** list. 3. Scroll down and tap **Rename Item**. 4. Select a name from the list or select **Custom Name**. 5. For Custom Name, input a name and select an emoji. 6. Tap **Done**.

Changing the Name of Your Wallet

4. Do not attempt to disassemble, modify, or use sharp objects to damage the device in any way, as it may cause serious damage and void the warranty

1. Open the Find My app and tap the **Items** tab. 2. It can be used for 4 months

5. Do not expose the device to corrosive liquids, or high humidity as they will seriously damage the device and void the warranty.

6. Tap **Done**.

More Specifics

1. How long will it take to fully charge?

1. The device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

2. How do you know the remaining time?

1. iPhone 12 or later will display the remaining battery level of the device.

3. How long does it take to fully charge the battery?

1. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

4. What technology is used for charging?

1. Adopting MagSafe wireless charging technology

5. How should the device be charged?

1. For this equipment, pursuant to part 15 of the FCC Rules, the limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.

2. Increase the separation between the equipment and receiver.

3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

4. Consult the dealer or an experienced radio/TV technician for help.

6. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

CC Caution

6. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

7. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

8. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

9. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

10. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

11. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

12. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

13. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

14. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

15. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

16. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

17. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

18. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

19. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

20. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

21. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

22. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

23. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

24. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

25. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

26. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

27. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

28. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

29. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

30. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

31. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

32. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

33. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.

34. Charging indicator light

1. The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction.
