

Shenzhen cadothy technology Co.,Ltd

Amaze

Amaze is a highly integrated artificial intelligence live broadcast device. Equipped with Samsung ISOCELL GN1 image sensor, using f/1.8 large aperture lens, 1/1.3-inch outsole, effective resolution of up to 50 million pixels; using full-pixel dual-core focusing technology, 30ms ultra-fast auto-focus; AI intelligent color restoration algorithm, let the color more realistic. Using Qualcomm Snapdragon™ 865 flagship 8-core 64-bit processor, 7nm process, the frequency is up to 2.84Ghz, with 8+256G large memory, the performance is 1.5 times higher than the previous generation. The total heat dissipation area is as high as 620,018mm², the continuous live broadcast will not freeze for 72 hours, and the temperature will continue to be stable within 48°C, giving you a smooth live broadcast experience. Equipped with a 10.5-inch rotatable touch screen, asymmetric rotating design, and support for horizontal and vertical screen live broadcast. In addition, it comes with a large battery of 10000mAh, which can be played anytime, anywhere. The body is light, only 3.7kg. It has built-in live broadcast creative software, built-in Xi Xi Director, Duo Duo Prompt, Remote Camera and other software, which can easily realize professional directing functions such as camera position switching, virtual live broadcast room, picture synthesis, and remote picture.

FCC compliance statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
