Warranty Note

Thank you for purchasing our products. All our products follow after-sales service policy of 7-day replacement and 1-year warranty. To ensure your legitimate interests, please read this warranty card carefully and keep it properly.
 1. This warranty card is the only certificate for the warranty of the machine.
 2. Within 7 days from the date of sale, the machine can be replaced by the same model if there is only a performance failure while the machine itself along with the package are guaranteed to be in good condition.
 3. Within 1 year from the date of sale, the machine follows warranty service policy (excluding human factors) in case of performance failure.
 4. The machine exceed 1 year is not covered by the warranty.
 5. Accessories are not covered by the warranty.
 6. The machine which was dismantled by Non-staff personnel is not covered by the warranty.
 7. The machine without a warranty card is not covered by this warranty.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The devices has been evaluated to meet general RF exposure requirement , the device can be used in portable exposure condition without restriction
