Solder Board-Component View 2	 A photograph of a small, circular green printed circuit board (PCB) component. The component is positioned on a blue textured surface. A metal ruler is placed horizontally below the component, showing a scale from 1 to 8 mm. Another ruler is placed vertically to the left of the component, showing a scale from 1 to 10 cm. The component has various electronic components and markings, including "Hcom_V04" and "008 5 9".
Solder Board-Component View 3	 A photograph of the same circular green PCB component from a different angle. The component is positioned on a blue textured surface. A metal ruler is placed horizontally below the component, showing a scale from 2 to 8 mm. Another ruler is placed vertically to the left of the component, showing a scale from 2 to 8 cm. The component features a central integrated circuit (IC) labeled "U4" and several gold-colored solder points along its bottom edge.

Solder Board-Component View 6	 A photograph showing a small yellow electronic component with two thin wires (one red, one black) soldered to its leads. The component is placed on a blue textured surface. A black ruler with white markings is positioned vertically and horizontally next to the component for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.
Antenna View	BLE Antenna  A photograph of a green circular printed circuit board (PCB) with various electronic components. A red rectangular box highlights a specific area on the PCB, which is labeled "BLE Antenna" with a red line pointing to it. The highlighted area contains a small, rectangular, gold-colored component. Other components visible on the PCB include a larger square component with a QR code and the text "203000 4BA436", and several smaller components and solder joints. The PCB is placed on a blue textured surface.
