

Operation Description

The battery is input in parallel with the TYPEC, and the power supply is provided by the LDO step-down voltage regulator. Bluetooth chip control LED, motor; Communicate with fingerprint chip through SPI; Communicate with touch keyboard chip through serial UART; External 24MHz, 32.768kHz crystal oscillator.

Product Name: Smart lock

FCC ID: 2BCIG-GM3

Operation Frequency: 2402MHz~2480MHz

Antenna Type: PCB Antenna

Antenna Gain: 0dBi

Crystal Value: 24MHz, 32.768kHz
