Do not install the battery upside down

③ is the Battery Lid

Function Operation Guide

1. Press and hold the Upper Cover for 3 seconds to turn on. The Foot Pedal will automatically turn off if not operated for 45 minutes.
2. Connect within 30 seconds after turning on. The Foot Pedal and Tattoo Machine (Ai-Tenitas Only) are connected via APP.
3. After the Connection among the Foot Pedal, Tattoo Machine and APP, the Foot Pedal is able to control the start and pause of the Tattoo Machine. The Foot Pedal has 2 working modes, Click mode and Press mode.

4. Ambient lighting effects can be set on the APP, e.g. normal, breathing and colorful.

5. The internal battery is charged via Type-C. The indicator light is red while charging and turns green when fully charged.

6. The indicator light is green when the battery is full, and red when the battery voltage is lower than 3.5V.

7. The RCA Connector can be connected to an external power supply to control the start and pause of the wired tattoo pen.

RCA

Display of waiting for connection status of the Foot Pedal in the APP.

After the Tattoo Machine and APP are connected, turn on the Foot Pedal and the APP will automatically scan the Foot Pedal (Pic 3), then click "Use It". While the Screen of the Tattoo Machine shows "📶", means that the Tattoo Machine, Foot Pedal, and APP are connected.

FCC REQUIREMENT

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,

uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio /TV technician for help.
