## 3. Adding a Lock

Step 1: Press any key to wake the lock, you'll hear a voice prompt "Please add Administrator".
If not, reset the lock before proceeding.

**Step 2:** In the TT App, tap **Add Lock.**

Step 3: Select **Door Lock**.

Step 4: Add the lock that appears.

Step 5: Name your lock and tap **OK**.

Step 6: Select the correct door opening direction.

Step 7: Connect to a 2.4GHz Wifi network (5GHz is not supported).

4. Setting Up Administrator Password

Method 1: **Manual Setup via Keypad**

1. Enter the default initialization code:

   *12#123456# (refer to your manual if a different code applies)

2. When prompted: "Enter administrator password#", input a 6–8 digit numeric password.

3. When prompted again: "Confirm password#", re-enter the same password.

4. The system will confirm: "Administrator password set successfully".

Method 2: **Setup via Mobile App**

After binding the lock to the TT App, the system will automatically generate an initial administrator password.

You can set a new administrator password directly through the app's settings.
