

Specification for Telescopic Antenna For Remote Control

1. Model: 36
2. Material: Zinc alloy and copper.
3. Length: The length of the contract: 44MM.
The length of Elongation: 112MM.
4. Function: Used for increasing the transmitted signal of radio frequency remote control.
5. Antenna gain peak of 315MHz is 0.5dBi.
6. Pictures:

5, Manufacturer: Shenzhen Guohengtong Industrial Co., Ltd
