Battery Charging Guidelines

Initial Charging: Charge the battery before using it for the first time or if it has been unused for an extended period.

Wired Charging: Connect the USB cable to the USB power adapter and plug it into the device's multipurpose jack for charging. Once fully charged, disconnect the charger from the device.

Battery Charging Tips and Precautions

Use Approved Accessories:

Only use Black Shark approved battery, charger, and cable designed for your device. Using incompatible accessories can cause serious injuries or damage.

Proper Connection:

Ensure the charger is connected properly to avoid damaging the device. Misuse resulting in damage is not covered by the warranty.

USB Type-C Cable:

Use only the USB Type-C cable provided with the device. Using a Micro USB cable may damage the device.

Avoid Wet Charging:

Do not charge the device if the multipurpose jack is wet, as it may damage the device. Ensure the jack is thoroughly dry before charging.

Inserting the Card

SIM Card Insertion:

Press the card pin into the side hole. The card tray will pop up, allowing you to pull it out.

Place the Nano SIM card or Nano SIM and TF card with the metal side facing down into the card slot. Ensure the bevel angle aligns with the card slot's bevel angle and is placed in the corresponding slot.

Inserting the Card Holder:

With the pad facing up, insert the card holder into the pad following the direction of the arrow.

Power On/Off and Reset Instructions

Turning the Device On

Press and hold the Side button for a few seconds to power on the device.

Turning the Device Off

Simultaneously press and hold the Side button and the Volume Down button.

Forcing Restart

If the device becomes frozen and unresponsive, press and hold the Side button and the Volume Down button simultaneously for more than 7 seconds to force restart it.

Maintenance

To ensure safe and effective use of the pad and extend its service life, follow these maintenance guidelines:

Handle with Care

Avoid dropping, knocking, or shaking the pad. Rough handling can lead to screen rupture, damage to the internal circuit board, and delicate structure.

Cleaning

Use a soft cotton cloth dampened with water or mild soap to wipe the pad case. Avoid using chemical solvents or detergents. Clean the lens and display with a clean, dry, soft cloth.

Charger Usage

Unplug the charger from the power outlet when not in use. Avoid leaving a fully charged battery connected to the charger for an extended period to prevent overcharging and battery life shortening.

EU regulations

RED declaration of conformity We, Blackshark Technologies (Nanchang) Co., Ltd.

The simplified EU declaration of conformity referenced in Article 10 (9) shall be provided as follows: Hereby, [Blackshark Technologies (Nanchang) Co., Ltd.] declares that the radio equipment type [4G Digital Tablet]

is in compliance with Directive 2014/53/EU.

The full text of the EU declaration of conformity is available at <https://global.blackshark.com>.

AR: The maximum electromagnetic radiation absorption ratio (SAR) of this product is 1.68W/kg, complying with the requirements of the national standard GB 21288-2007.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in

portable exposure condition without restriction

Specific Absorption Rate (SAR) information:

This product meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.68 W/kg averaged over one gram of tissue. Device types: BSA1 (FCC ID: 2BCNP-BS-PAD) has also been tested against this SAR limit. The highest SAR values for body are 0.73 W/Kg. This device was tested for typical body-worn operations with the product kept 0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0cm separation distance between the user's body and the product. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 0cm must be maintained between the user's body and the product, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components.

Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
