

Earphones User Manual

It is recommended to read this user manual carefully and keep it for future reference.

Product overview:

Specifications:

- Operating distance: Up to 15 meters
- Frequency: 60Hz-15KHz
- Earphones: Lithium polymer battery 30mAh
- Charging station: Lithium polymer battery 200mAh
- Charging voltage: 5V
- Working Time: 2.5h
- Standby Time: 90h
- Charging Time: 2h
- SNR: 70dB
- Impedance: 32ohms
- Distortion: less than 3%
- Compatible with A2DP1.3/HFP1.6/HSP1.2/AVRCP1.6/DI1.3
- Charging cable included

Charging:

Charging station

Use the cable provided for charging. Connect USB cable to computer / AC adapter and connect the other end of the cable into the charging port of the charging station.

During charging process, the green indicator light will start to flash. As the charging process is completing the lights will appear, according to the charge level available on the unit. When the charging station is fully charged the full green indicator lights will stay on.

Note: if the earphones are in the charging station, both will be charged at the same time.

Earphones

Place the earphones into the charging station and the charging process will start automatically. While the charging station has power, the green indicator light will stay on. During the charge transmission, the power of the portable charging device will decrease and the lights will start to disappear indicating the remaining charge capacity available. Every light represents 25% of the total charge.

During charging the indicator light of the earphones will turn red. When the earphones are fully charged the indicator light will turn blue and then turn off.

Operation:

Pairing

From the menu of your device, search for new devices and select "OnePiece" to pair. Once they are paired successfully, the light indicator on left earphone will turn off.

Note: Hold the multifunction button of each earphone to power off the device.

Controls:

Answer/End call:

Short press the multifunction button of any earphone.

Reject call:

Long press the multifunction button of any earphone.

Play/Pause music:

Short press the multifunction button of any earphone.

Double synchronization

Hold the multifunction button to power on both earphones until the red indicator light and blue indicator light on both earphones start to flash. You will hear a confirmation sound indicating both devices are paired correctly.

The indicator light on the left /right earphone will continue flashing and the indicator light on the left/right earphone will turn off.

Note: The volume must be adjusted from your mobile device.

Troubleshooting

Fault

Solution

Unable to pair up with other devices.

- Check whether the earphone is still on the process of search or switch it off and on again.
- There are too many devices in the proximity that cause difficulty in connection.
- Do not dismantle, repair or modify this product by yourself, contact an authorized specialist.
- Turn off other devices.
- Make sure your earphone is in "Pairing Mode".

The sound is low or distorted.

- Check the device's volume and then adjust it to an appropriate level.
- Recharge the battery.

Occasionally the music stops.

- Check whether the earphone effective transmission range is exceeded or if there is an obstacle standing between the earphone and other devices.
- Excessive sound pressure from earphones and headphones can cause hearing loss.

Warnings:

Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Important Note:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Recycling:

This symbol both in the product and its user manual indicates that at the end of the device's life, it should be recycled separately from household waste. There are adequate means to dispose of this material for proper recycling. For more information, contact your local authorities.
