## Add Device

Connect the device to the power source and switch it to the ON position. When the device emits a "beep-beep" sound, click "Add Device" on the APP home page or the "+" in the top right corner. Choose "Camera/Lock" → Smart Camera (WiFi) → Next → Enter WiFi password → Scan the QR code on your phone with the device's camera lens -- Wait for the "ding" sound → Hear the prompt tone → Done. The device installation is now complete.

## View Live Video

Click on the device to enter the camera control preview interface (Figure 3). The interface displays live video and allows you to switch resolution and perform full-screen operations. The bottom menu provides options for taking photos, two-way talk, recording, video playback, photo album, and alarm settings.

Click the device button in the top right corner to enter the settings interface (as shown in Figures 4 and 5). You can set the camera name, alarm settings, storage settings, and basic functions.

※If this explanation is not detailed, please refer to the actual product

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
