

RECHARGEABLE BLUETOOTH® REMOTE CONTROL BATTERY

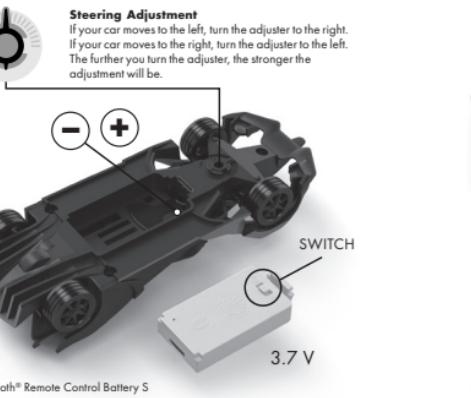

SAFETY PRECAUTIONS

- Check device voltage for compatibility before use. If you use a dual voltage (e.g. 5V/9V) adaptor, ensure the adaptor will only charge at 5V with this battery before charging.
- Recharge Li-Po rechargeable battery only under adult supervision.
- Do not allow the unit to come in contact with water or moisture.
- Do not disassemble or try to repair or modify.
- Do not store Li-Po rechargeable batteries in high or low temperatures or small enclosed areas without ventilation, and do not put them in fire.
- Do not drop, bump, throw or shake the unit, as this may damage internal components.
- Do not use harsh chemicals or cleaning agents on the exterior of this unit.
- If the battery becomes excessively hot, emits odour, gets dented or experiences any abnormal deformity, you should stop using it immediately.
- Only dispose of the battery at authorized recycling centres.
- Remove exhausted batteries from the toy.
- The supply terminals are not to be short-circuited.
- Rechargeable batteries are to be removed from the toy before being charged.
- Battery is to be inserted with the correct polarity.
- Chargers used with the toy are to be regularly examined for damage to the cord, plug, enclosure and other parts, and that, in the event of such damage, the toy must not be used with the charger until the damage has been repaired.

INSTALLING THE BATTERY

Care needs to be taken when inserting the battery in order to avoid damaging your car, so please follow the steps below carefully:

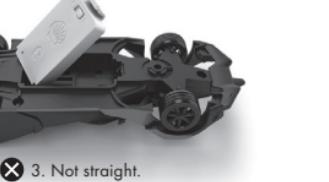

- 1 Insert the battery the correct way up. The metal connectors should be face down in the car so you cannot see them once it is inserted. (See image 1).
- 2 Carefully insert the battery on an angle into the car (see image 1) and press gently as you lower the battery into place. Once flat press the end of the battery to gently fix into place.
- 3 Do NOT slide or push the battery into the metal connectors on the base of the car as you may damage them.
- 4 Scan the QR code on this manual or your car box to install the Shell Racing App.

1. This is correct.

2. Wrong side is up.

3. Not straight.

4. Angle is wrong.

CHARGING YOUR BLUETOOTH® REMOTE CONTROL BATTERY

- Warning!** Do not use rechargeable batteries and USB cables other than those specified in this user manual. The use of non-specified rechargeable batteries and USB cables may create a safety hazard and/or impair equipment performance. Keep children and pets away from rechargeable batteries and USB cables.
- Please note: Always check the voltage compatibility of your device before connecting it to the lithium rechargeable Bluetooth® battery.
- Insert your micro-USB charging cable into the input port of the lithium rechargeable battery.
- Insert the other end into your electronic device.
- Your device should indicate that charging has started.
- The LED indicator on the battery will light up to show that the lithium rechargeable Bluetooth® battery is charging. The LED indicator will diminish in intensity when the lithium rechargeable battery is fully charged.
- When you are finished with charging, please remove the USB cable from the lithium rechargeable battery.
- To start racing, use the switch on your battery labelled I/O. I is for on and O is for off.

Important: Charge the battery at least every 3 months.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

LI-PO BATTERY SPECIFICATIONS

- Bluetooth® v4.2
- Cell type: Lithium polymer rechargeable battery 3.7 V 850 mAh
- Input: USB 5 V 0.1 A
- Acceptable device types include a computer, a laptop or a USB wall plug adapter (5V).

Your car is designed to be used and performs best on hard flat surfaces. Do not drop or use your car on raised surfaces such as tables as damage can be caused when falling to the floor.

CE-INFORMATION

Hereby, BrandBase declares that the device Bluetooth® Remote Control Battery (model number MSBTlipoS) when used as intended, is in compliance with the basic requirements and other relevant provisions of Radio Equipment Directive (RED) 2014/53/EU. The declaration of conformity can be found on the Internet at www.brandbase.nl/en/support/doc

The Max. transmit power of the battery is -3.741 dBm, which is less than 13dBm (20 mW), the device is deemed to comply with the basic restriction, compliance with EN50566: 2017 is demonstrated. (Frequency band 2402MHz – 2480MHz)

This is a non-replaceable battery. The battery can only be connected to class II or class III equipment .

Do not dispose with other household waste. It is your responsibility to dispose of your waste equipment separately from the municipal waste stream. The correct disposal of your end-of-life equipment will help prevent potentially negative consequences for the environment and human health.

Important: Charge the battery at least every 3 months.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
