

Huerich 2.4G remote control manual

1. Functional features

This product is a high performance LED bulb supporting remote control, wireless remote control, control light switch and timing off, adjust brightness, color temperature. No additional wiring, simple installation, easy operation, safe and stable. The intelligent lighting of lamps is realized, which is suitable for different scene requirements without other changes.

2.4G high frequency wireless remote control, with low power consumption, long transmission distance, strong anti-interference ability, high air communication rate characteristics. The remote control is stylish and beautiful in appearance, practical and simple in function, and comes with power off memory (that is, when it is turned off or turned on again after power off, the bulb will automatically retain the light state before shutdown). And has a small night light, and other specific scene one-click direct function.

Can directly replace the traditional lamps, widely used in living room, kitchen, living room, hotel, club, meeting room and other places.

2. Remote control key mapping

3. Basic function operations

3.1 Code: The remote control can only be used after code operation with the LED bulb light, the method is as follows:

Install the LED bulb, confirm that the power connection is complete, cut off the power 10 seconds after the power to reconnect the power, in the power on instant (within 5 seconds), press the remote control on the key, the bulb will flash, indicating that the code is successful.

Note: One remote control can control a maximum of 15 bulbs, but a bulb can only accept a maximum of three remote control matches.

FCC warning statements:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
