Trouble Shooting

Q1: The product can't pair with the Bluetooth enabled phone,MP3, etc.

1. Please make sure you have power on the receiver, and the toggle switch right position.
2. Clear the pairing list of your Bluetooth enabled phone, MP3, etc, then try again.

Q2: The Bluetooth signal or the sound quality is not good.

Bluetooth signal can be blocked by surrounding objects and reduce the audio quality, please put it in the right position without barrier between adapter and your phone (or other devices).

Q3: Why is the sound so small?

The final volume could be affected by the receiver, the speaker and the mobile phone. So please make sure that you have adjusted the volume of all the three devices.

Q4: Why can't the receiver connect to the last connected device automatically?

The receiver is designed to be connected automatically to the last connected device. But if we have disconnected the Wireless connection from smart phone or we just close the Wireless function when the receiver was in use, this may happen and you need to reconnection manually.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

To maintain compliance with FCC'S RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
