

### 1. Antenna Specification

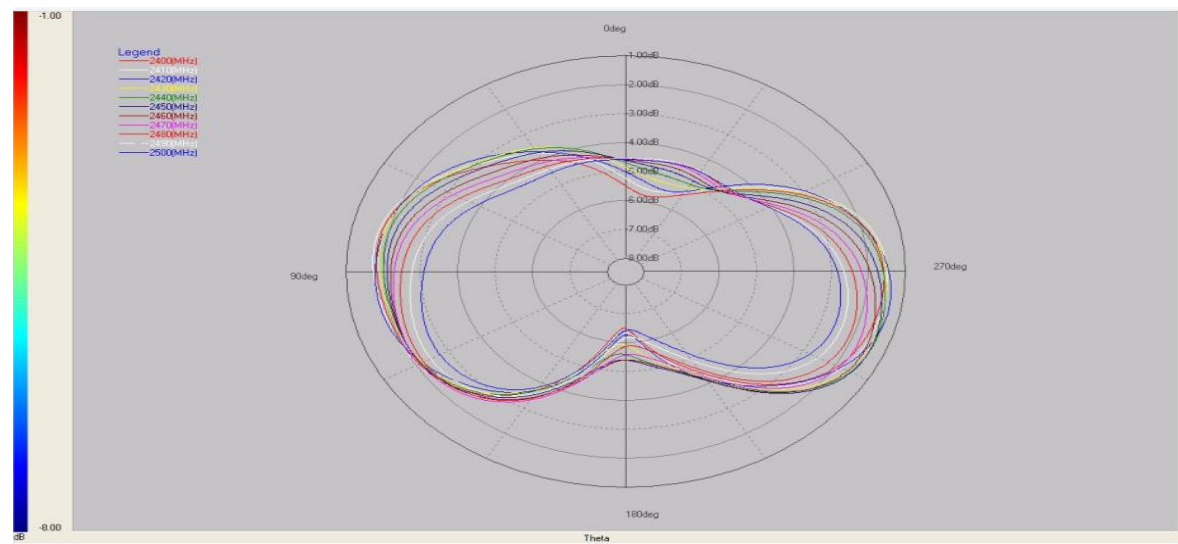

| Item                    | Specification                                           |
|-------------------------|---------------------------------------------------------|
| Working Frequency Range | 2.4–2.5GHz                                              |
| Max PK Gain             | 2400MHz:-0.16dBi<br>2450MHz:0.00dBi<br>2500MHz:-0.11dBi |
| VSWR                    | 2.0 Max                                                 |
| Polarization            | Linear                                                  |
| Type                    | PCB                                                     |
| Impedance               | 50 $\Omega$                                             |
| Manufacture             | ZHUHAI JIELI TECHNOLOGY CO.,LTD                         |
