## Product A/S

- For questions about device repair, handling, management, and apps, contact the customer service center or the place where you purchased the device.
- Please receive the warranty after confirming that the 'purchase date' and 'dealer information' are written at the place of purchase.
- In the case of a paid A/S request, if there is no purchase warranty, you must present the purchase receipt specifying the product name and place of purchase.
- The warranty period is one year from the date of purchase. If you request repair within the warranty period, please contact the customer service center or the place of purchase.
- The warranty period can be applied based on the contents of the warranty or purchase details.
- Repair fees will be charged for breakdowns caused by customer negligence, such as damage due to impact or submersion.
- After the warranty period has elapsed, paid repairs are provided through the customer service center.
- However, if 3 years have passed since the release date of the product, repair may be difficult depending on availability of parts.

## NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## FCC Radiation Exposure Statement :

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 15 mm between the radiator & your body.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
