Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) assembly, identified as 'View 2'. The board is populated with various electronic components, including integrated circuits, resistors, and capacitors. It features a green RJ45 port at the top and a blue RJ45 port at the bottom. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters. The ruler shows the board is approximately 100mm long and 40mm wide.
Solder Board-Component View 3	 A photograph of the same green PCB assembly, identified as 'View 3'. This view shows the board from a different angle, highlighting the components on the opposite side. It includes a green RJ45 port at the top and a blue RJ45 port at the bottom. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters. The ruler shows the board is approximately 100mm long and 40mm wide.

Solder Board-Component View 10	 A photograph of a green printed circuit board (PCB) component, labeled PCB-TN-V03, positioned on a blue textured surface. The component is oriented vertically and features a blue terminal block with three silver-colored pins at the top. A black ruler with white markings is placed horizontally to the left of the component, showing measurements in millimeters (0 to 70 mm) and centimeters (10 to 50 mm). The component has various electronic components, including resistors and capacitors, and a gold-colored connector at the bottom.
Solder Board-Component View 11	 A photograph of the same green printed circuit board (PCB) component, labeled PCB-TN-V03, positioned on a blue textured surface. The component is oriented vertically and features a blue terminal block with three silver-colored pins at the top. A black ruler with white markings is placed horizontally to the left of the component, showing measurements in millimeters (0 to 70 mm) and centimeters (10 to 50 mm). The component has various electronic components, including resistors and capacitors, and a gold-colored connector at the bottom.
