Solder Board-Component View 2	 A photograph showing a small green printed circuit board (PCB) component with two silver-colored solder joints. The component is positioned on a blue textured surface. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm.
Solder Board-Component View 3	 A photograph showing the same green PCB component from a different angle, highlighting the solder joints and the component's profile. The component is placed on the same blue textured surface. A black L-shaped ruler with white markings in millimeters is used for scale, with the vertical scale ranging from 0 to 100 mm and the horizontal scale ranging from 0 to 100 mm.

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, identified as a solder board-component, positioned on a blue textured surface. The component is L-shaped and features two silver-colored pins on its left side. A black L-shaped ruler with white millimeter markings is placed next to the component for scale. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm.
Solder Board-Component View 5	 A photograph of the same green PCB component from a different perspective, showing its top surface. The component has two circular solder pads on its left side and several pins on its right side. A black L-shaped ruler with white millimeter markings is placed next to it for scale, with the vertical scale ranging from 0 to 100 mm and the horizontal scale ranging from 0 to 100 mm.

Solder Board-Component View 10	 A photograph of a green printed circuit board (PCB) component, likely a solder board, placed on a blue textured surface. The component is irregularly shaped and features various electronic components, including a large black integrated circuit (IC) in the center, several smaller ICs, and numerous surface-mount components. A black L-shaped ruler is positioned to the left and bottom of the component, providing a scale in millimeters. The ruler shows markings from 0 to 100 mm on both the horizontal and vertical axes.
Antenna View	WIFI/BT Antenna  A photograph of the same green PCB component, viewed from a different angle. A red rectangular box highlights a small, thin, rectangular component on the top edge of the board, which is identified as the WIFI/BT Antenna. A red line points from the text label "WIFI/BT Antenna" to this highlighted component. The component is a small, thin, rectangular piece of material, possibly a flexible antenna, mounted on the PCB.
