- 5: Plug in the power test function

If you encounter any problems, please contact us. E-mail address: a18576001939@163.com

Precautions:

- 1: Please read the product installation instructions carefully before installation.
- 2: All products need to be installed by professional electricians and technicians during installation and maintenance.
- 3: Please cut off the power supply before installation, and the power-on test is strictly prohibited (the power supply can only be started after the straight-through installation is completed)
- 4: The bedside table should not be installed and used outdoors or in humid spaces.
- 5: The input voltage of the bedside table is 110V, and the maximum light source power used is 60W.
- 6: If you have any questions about the installation instructions of the bedside table, please contact customer service.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body:
Use only the supplied antenna.
