VII. Specifications

| | |
|--------------------------|---|
| Indoor Monitor | 4.3 Inch LCD Screen |
| CPU | GK7102S |
| External Storage | Support Micro SD (Max to 64G) |
| Video Recording | Support |
| 2-Way Audio | APP 2-Way Communication |
| Camera Resolution | 1080P/720P |
| Battery Capacity | 4500mAh |
| Max PIR Distance | 3 Meters |
| Alarm | PIR Motion Detection |
| PIR Sensor Angle | Max to 90° |
| Wireless Standard | IEEE802.11 b/g/n |
| View Angle | 165° Diagonal /130°Horizontal |
| Charging Type | Mirco USB |
| Dimension | Monitor 135*92*22.5mm, Doorbell Camera Ø 65*19 |
| Temperature and Humidity | -15°~60°C |
| Recommended Charger | DC5V2A±10% |

VIII. Notice

- Please remember to fully charge the battery with 5V2A charger at least 8-10 hours to activated the total battery capacity before using it.
- 4500mAh built-in battery and long life, last about 1-2 Months (3-5 times calling per day). It will send APP notification when the battery is insufficient. Please recharge the device in this situation in time.
- Please put the device in the range where the WiFi signals can be received well. Please note that too thick door might reduce the signals even it is not too far away from the router. We suggest to test the device and wifi signal range before installation.
- Built with low consumption chip, this device support 3 wake-up methods: App remote wake-up; PIR motion detection wake-up and call button—pressing wake-up. It will go into sleep standby mode within certain time when it is not woken up.
- NO on-screen menu Interface, recordings and settings are managed in the phone APP. 2-way communication is between the camera unit and the App. There is no microphone with the indoor monitor.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
