Headset overview

【Charging and battery】

- Before charging, Please turn off the headset first.
- Plug the USB charging cable into the headset charging interface, Plug the USB at the other end into a USB charger or other charging device. At this time, the headset starts to charge. When charging, the blue breathing light jumps on.
- The headset is fully charged, which takes about 1 hour. The blue light is always on after it is full.

Warning: you must use the matching charging cable to charge the headset. The charging standard is that the DC 5V current is 100mA.

【Bluetooth pairing steps】

- Please control the distance between the Bluetooth headset and the mobile phone (or other devices used for connection) within 1 meter, the closer the better.
- Press and hold the headset multifunction key for 3 seconds, and the blue light flashes to enter the pairing state.
- Turn on the Bluetooth search function of the mobile phone or other required connecting devices, Select "Bluetooth" from the Bluetooth list of the mobile phone and click to pair, (some mobile phones enter "0000" as the pairing password), The Bluetooth headset will automatically connect with the mobile phone. The blue light on the connection is off, and the voice reminder is connected.

Headset overview

【Disconnect the Bluetooth connection between the headset and the mobile phone: please use any of the following methods】

- Turn off the Bluetooth function of the mobile phone or long press the multi-function key of the headset until the blue light goes out, and the headset will turn off automatically.

【Reconnect the paired headset to the phone】

- At the same time, turn on the Bluetooth search function of the mobile phone or other devices that need to be connected. The Bluetooth headset will automatically reconnect with the last connected mobile phone.

Note: the pairing time of Bluetooth headset is about 5 minutes at most. If the light is off, Indicates that Bluetooth pairing status has stopped. If you are still not paired successfully, please retry steps 1 to 3 to pair.

【Technical parameter】

- Version: 5.3
- Transmission distance: 10 meters straight without obstruction
- Unit Size of Horn: 10MM&13MM
- Frequency: 20Hz-20,000Hz
- Resistance: 32Ω
- Sensitivity: 108±3dB
- Charging Specification: DC5V
- Operation Voltage: 3.3V-4.2V
- Supported Agreement: A2DP/HFP/SPP/HID/PBAP
- Texture: ABS

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

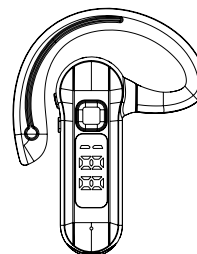

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
