## Bluetooth keyboard connection

1. After turning the Bluetooth switch to the ON position, the power indicator light will stay on for 3 seconds, press FN + Connect at the same time, the Bluetooth indicator light will start to flash, and the Bluetooth keyboard will enter the pairing state.

3. In the settings menu, click on the "Bluetooth" menu.

5. Discover the Bluetooth keyboard device: Bluetooth Keyboard, and click on it, the Bluetooth keyboard will automatically connect.

2. Open and unlock your tablet and click on the "Settings" icon.

4. Turn on the Bluetooth switch and the tablet will automatically search for Bluetooth keyboard devices.

6. After the Bluetooth connection is successful, the pairing indicator is off, and "Connected" will appear in the list of Bluetooth devices.

## ① Attention

1. When not use for long time, suggest to close keyboard, in order to prolong battery life.
2. In order to obtain longer battery life, the charging time must be more than 2 hours before charging when the low voltage indicator of the keyboard flashes.

## Energy saving sleep mode

When the keyboard is not in use, it will enter the sleep state after 10 minutes, and the keyboard indicator will be off. When it is used again, press any key to wake up, and the keyboard indicator will be on.

## Troubleshooting

1. Make sure the power is turned on
2. Ensure keyboard operable distance
3. Make sure the battery has power
4. Ensure the device's Bluetooth was turned on
5. Ensure the wireless keyboard was connected with the Bluetooth
6. Ensure the wireless keyboard paired successfully

## Cleaning

Washing, alcohol or a similar cleaning agent decontamination keyboard.

## Charging

When the blue light of the power indicator flashes slowly, it means that the power of the keyboard is low and needs to be charged

1. Use the Type-c data cable to connect the charging port to charge the keyboard.
2. When charging, the charging indicator light turns red, and the red light turns off when fully charged.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The devices has been evaluated to meet general RF exposure requirement , the device can be used in portable exposure condition without restriction
