RE: Model Differences

To whom it may concern:

We, WEG Drives & Controls – Automação Ltda, attest that WEGScan 100 and WEGScan 101 have the same circuit and functionality. The unique difference between both models is the power supply circuit. WEGScan 101 uses 24Vdc/ac power supply as energy source and WEGScan 100 uses 3.6 V battery as energy source.

Sincerely,

Name: Vitor Telles Odagui

Title: M.Sc. Electrical Engineer

Job Position: Certification Analyst
