

BT56

Bluetooth wireless
transmitter/receiver

Product Introduction

This product is a three in one device that integrates wireless reception, transmission, and communication. The product is easy to operate and can freely transmit and receive all audio signals. Through the wireless mode of the product, the phone's music can be transmitted to traditional old-fashioned home speakers or car speakers to answer calls. It can also send audio from computers, TV CD players, etc. to Bluetooth headphones or speakers for playback through the wireless transmission mode

instructions

In receiving mode (RX)

- Plug in the USB and power on. The default receiving mode is to wait for connection (blue light flashes). After successful connection (blue light stays on), insert the device into the AUX interface headphones or speakers, turn on the Bluetooth of the phone, select BT56 from the Bluetooth list for pairing, and after successful connection, open the phone music player software to enjoy music. You can also plug in the TF card to listen to music

- When there is a call, press ►||| briefly to answer or end the call In transmission mode (TX)

- Plug in the USB to power on, press ►||| and hold to enter transmission mode. Wait for connection (red light flashing), connect successfully (red light constantly on). Insert the device into your phone, computer, tablet, MP3 player, CD player AUX interface and Bluetooth earphones: the car's Bluetooth automatically pairs, and the red light stays on after successful pairing. You can listen to music from your computer or TV, or transmit TF music to Bluetooth devices for playback

In launch mode, double-click ►||| switch between TF card and AUX audio input functions

Product parameters:

Wireless transmission distance: accessible 15 meters

Product size: 72 * 33 * 20mm, wire length: 70CM

Product quantity: 30g

Wireless transmission protocol: A2DP/AVRCP

Wireless calling: Supports

Input/output mode: 3.5mm (AUX) audio head suitable for scenarios; Various types of speakers/cars/computers/televisions/amplifiers, etc

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
