8、10/100/1000 Mbps RJ45 Ethernet Interface

Disclaimer

1、Please ensure that you use the original power supply provided with the product. Our company will not be held responsible for any issues or malfunctions that may occur as a result of using a third-party adapter.

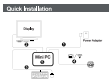
2、Users can use music videos, pictures and software provided by third parties, but we do not assume any responsibility for copyright issues or software failures.

3、In the event of a product breakdown, we will kindly advise to the warranty terms. However, we will not be liable for any loss of property.

4、The equipment comes pre-packed with instruments and basic software. Whether the software is official or retained during compatibility testing or for other reasons, it will not affect the functionality of the device. Please note that this is not a product quality-related issue.

5、The company reserves the right to enhance the product. If there are any changes to the product specifications or design, no further notice will be provided. Please refer to the actual product for accurate information.

Quick Installation



Note: Before using the product, please connect the power adapter.

Note: Please connect the display device via HDMI cable (included in the package) or DP cable (not included TYPE-C cable).

Note: Please prepare your own keyboard and mouse with a USB interface and cable. These are not included with the product.

Note: Connect the internet via network cable or WIFI.

Note: Press the power button and after indicator shows white, follow the on-screen instructions to configure the operating system and pre-installed software, and do not turn off the power until done.

Caution: If the power adapter is damaged, it must be replaced with a special adapter bought from its manufacturer or service department.

Indicator Status Description

On	Always on
Sleeping	Breathing

Packing List

Power Adapter x1
Mini PC x1
User Manual x1
HDMI Cable x1

Precautions

1、Please take extra care and ensure that necessary backup measures are in place before proceeding with any potentially risky actions.

2、Pay attention to virus protection during the use of network, and try to use virus boxes.

3、When the equipment is not in use for a long period of time, disconnect the power supply to prevent damage from electric shock and abnormal supply voltage during lightning storms.

4、Do not switch on and off the mini-host frequently in a short period of time. It is recommended that the interval between two startup times should be at least 10 seconds, preferably no less than 60 seconds.

5、Pay attention to moisture-proof and keep the use environment clean and ventilated. If there is dust on the host machine, please wipe it with a dry soft cloth.

6、Avoid direct exposure of strong light to mini-host, and do not approach strong magnetic field.

7、Keep away from water sources or wet places, such as bathrooms, kitchens, basements, swimming pools, etc., Do not get water, food and other liquids into mini-host, and do not pull the data cable, power cord.

8、Make sure the equipment is installed and placed in a stable place. If dropped, it may cause personal injury or equipment damage.

9、Store and use in a cool, dry and ventilated place, and keep away from radiation and heat sources.

10、Do not cover or block the ventilation holes on the housing, and do not place on the surface of a bed, sofa, blanket or similar objects.

Tips

1、Turn off your Mini PC

If your Mini PC does not respond, press the power button for at least 10 seconds until your Mini PC is turned off.

2、Boot into the system for the first time

When you startup your PC for the first time, you will be guided to configure your Windows operating system. Startup your Mini PC for the first time. Press the PC's power button. Wait for a few minutes until the user interface appears.

Note: Select the language/country (region)

Note: Select the inputting method, and click "confirm"

Note: Select the second inputting method, which can be "skipped"

Note: Networking: After selecting wifi, enter password to connect it. Or choose to plug network cable for connection, Disbursting will be updated automatically, and the update process will stay on an interface for a long time, which prolong the startup time. (Skipping network connections is strongly recommended)

Note: Accept License Agreement

Note: Set User Name and Password. Once the installation process is complete, the desktop will appear.

3、Enter the BIOS setting:

The BIOS (Basic Input/ Output System) is the first software loaded when the Mini PC starts.

Enter Bios: click "Del" or "DEL" key.

Under normal circumstances, the default BIOS settings work in most cases to ensure optimum performance. Do not change the default Bios settings, except for the following situations.

You have installed new system components that require further Bios settings or updates.

Caution: Inappropriate BIOS settings may cause instability or startup failure. We strongly recommend that you can only change the Bios settings with the help of technical service personnel.

Troubleshooting

Fault Phenomenon	Possible Causes	Solution
Unable to power on	No power supply	Check if the power cord is properly connected.
The monitor displays "No signal" or "Input not supported"	The resolution is too high	Use the compatible resolution supported by the monitor's specifications.
After the system installation, the monitor displays "Input not supported"	Hardware	Replace the faulty hardware or equipment that may cause incompatibility issues.
The mouse cannot be moved.	The system is frozen	Restart or unfreeze the system.
No sound when connecting to an external speaker.	Incorrect audio output device	Set the correct audio output device in the system settings.
Fan noise	Dust accumulation or fan damage	Clean the dust or replace the fan.
The system is slow and unresponsive.	Insufficient memory or high CPU usage	Close unnecessary programs or upgrade the memory
