(This function is an optional feature, please refer to the actual model)

### Precautions for use

① Due to its ultra-low standby power consumption, there is no need to deliberately turn off the mouse when used in a fixed location. It is recommended to keep the mouse turned off when carrying it out.

### Special Reminder

① Intelligent voice mice equipped with rechargeable batteries should avoid exposure to sunlight or storage in hot cars. Do not disassemble the mouse's casing or parts at will.

② The external surface of rechargeable batteries may cause accidental explosions or fires under certain pressure or local forces. If you need to carry them out, it is best to keep the mouse product in the closed state.

③ The temperature of the mouse in contact with the environment should not exceed 60 degrees Celsius, otherwise the rechargeable battery will accelerate aging.

④ The optimal temperature range for charging the intelligent voice mouse is 0-45 degrees Celsius.

#### FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device,pursuant to Part 15 of the FCC Rules.These limits are designed to provide reasonable protection against harmful interference in a residential installation.This equipment generates uses and can radiate radio frequency energy and,if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.However,there is no guarantee that interference will not occur in a particular installation.If this equipment does cause harmful interference to radio or television reception,which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules.Operation is subject to the following two conditions:(1)This device may not cause harmful interference, and(2) this device must accept any interference received,including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.The device can be used in portable exposure condition without restriction.
