Subject: Requesting Class II permissive change for FCC ID: 2BE5W-SELN131

Dear Examiner,

The purpose of this letter is to request a Class II Permissive change for FCC ID: 2BE5W-SELN131

The major change filed under this application is:

1. The subject approved module is being used in Monitor_SELN-131BRM.
2. This is a portable, and as the modular approval does not cover portable hosts, this C2PC is required to add this specific host to the scope of the modular approval.
3. A new tuning power table reflecting the power reduction is being submitted with this application.
4. The antenna used in this host device is of the same type.
5. The software security remains unchanged from the original application.
6. This device only uses ZigBee, and BT is disable by software.

Following actions are taken to demonstrate the compliance:

- a. The device qualifies for the Standalone SAR test exclusion, details please refer to this C2PC RF exposure report.
- b. Output power with radiated tests against the host were done.

Best Regards

A handwritten signature in blue ink that reads "Daisuke Aoki".
