# Instructions for use

Step 1 Install the USB receiver
Remove the battery cover, take out the USB receiver from the USB storage area, and insert it into the computer USB port.

Step 2 Install the battery
Prepare an AA battery, open the battery cover, place the battery in the correct polarity, and close the battery cover.

Step 3 Power on
Find the Power Switch at the bottom of the mouse and toggle it to "ON" .

Note: The mouse stops working when the voltage is lower than 1.5V (battery replacing is required).

# Mouse Specification

| Mouse Size: | 108x68x37mm | Product Weight: | 58g±10% |
|---|---|---|---|
| Connection Method: | 2.4G | Number of Keys: | 4 |
| Interface Type: | USB | Working Current: | ≦6mA |
| Working Voltage: | DC 3V±5% | Transmission Distance: | ≦10m |

**FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
