Wireless Vertical Trackball Mouse

U S E R M A N U A L

100mm

SET UP

1. Open the battery cover at the bottom of the mouse.
2. Take out the USB receiver from the mouse and insert it into spare USB port of the computer.
3. Put in one AA battery and place it in correct direction(by following the sign of positive and negative indicated inside),and then turn on power on <ON> position.
4. Your computer will automatically detect your mouse.
5. You can now use your mouse.

MOUSE NOT WORKING

- Ensure your computer is compatible with the system requirements.
- Ensure the mouse receiver is connected to the USB port.
- Check if your mouse is power on.
- Ensure your battery is charged and replace it when necessary.
- Ensure that there is no metal material between your mouse and the receiver.
- If you are using USB hub, please directly insert the receiver into the USB port of the hub.

FEATURES

- RF 2.4GHz technology, wireless range up to 10 meters
- 6 buttons with 1 multi-directional trackball
- On the resolution setting : 1000-1600-2400 DPI
- Vertical wireless trackball mouse, feel comfortable
- Ergonomic design to protect our wrist health
- Rugged construction
- USB 2.0 Nano receiver with plug and play function
- Automatic standby, deep sleep mode, energy saving
- There is no need for mouse pad, no need for drag operation, just need to roll the trackball by finger to move the cursor. Saves space and relieves wrist fatigue.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
