- Sleep detection:** when connected to the Watch, you can set the detection time of the Watch sleep detection, sleep heart rate detection auxiliary switch and other detection functions.

Precautions

It should not be worn when taking a bath or swimming.

- When synchronizing data, please connect the Watch.

Use the built-in charging cable to charge.

Do not expose the watch ring to a place with high moisture or extremely high or low temperature for a long time.

The wristband restarts unexpectedly. Please check the memory information of the phone to clear it and try again, or exit the APP and reopen it.

Watch Maintenance

- Do not scratch the sensor, protect it from damage

Wipe the surface of the Watch with a damp cloth and use mild soapy water to remove oil or dust

Do not expose the Watch to the environment with strong chemicals, such as gasoline, cleaning solvents, propylalcohol or insect repellent. The chemicals will damage the sealability of the Watch and the surface of the casing

Prevent your Watch from being subjected to strong impact and extreme high temperature exposure

When the lens and casing are intact, it is waterproof. Violent disassembly will affect the waterproofness.

Common Problem

- What should I do if Bluetooth cannot be connected? (Failed to connect / reconnect or slow connection / reconnect)

Answer: 1. Please confirm whether the mobile phone supports (IOS9.0 or Android 4.2 or above), mobile phones or tablet products with Bluetooth 4.0)

2. Due to the problem of signal interference in the Bluetooth wireless connection, the connection time may be different every time. If you cannot connect for a long time, please make sure to connect in a place where there is no magnetic field or too much Bluetooth device interference.

3. Turn off the phone's Bluetooth and then turn it on

4. Clear the phone background application or restart the phone

5. Do not connect your phone to other products of the same type at the same time

6. Whether the APP is still running in the background, if it is not running in the background, it cannot be connected

• Can't find the Watch?

Answer: Because the Bluetooth radio of the Watch is not searched by the mobile phone, please make sure that the Watch is powered on and activated, and it is not connected to other mobile phones. Put the Watch close to the mobile phone and search again. If it is still invalid, turn off the Bluetooth of the mobile phone for 20 seconds. Then restart Bluetooth and search again.

- Should the Bluetooth connection be always on? Will there be any data if it is closed?

Answer: Before synchronizing the data, exercise and sleep data will be kept on the wristband host. When the mobile phone and the Watch Bluetooth are successfully connected, the Watch will automatically upload data to the mobile phone, but the data stored by the Watch is limited, and only about one week of Bluetooth data can be stored. When the space is full, the earliest data will be automatically overwritten to generate the latest data. So please sync the Watch to your phone in time.

Remarks: If you turn on the incoming call and SMS reminder function, you need to keep Bluetooth connected, and the alarm reminder supports offline.

- What should I do if the Watch cannot be charged?

Answer: 1. Please confirm whether the direction of the charging stand is correct and whether the charging clip is in good contact with the Watch.

2. When the Watch power is lower than 3.6V, there will be a period of battery precharge time.

Remarks: After plugging in the charger, it will immediately enter the charging state. If there is no display, it will take 3-5 minutes to enter the charging state.

- Will wearing the Watch for a long time cause harm to the human body?

Answer: The radiation of the equipment is far lower than the FCC standard of the United States, and it is basically negligible.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

S85 PRO

SMART WATCH

Manual de usuario

Método de descarga de la aplicación

- Método de descarga de Android:** Busque "Hryfine" en el mercado de aplicaciones de Android para descargar la aplicación o escanee el código QR para descargar
- Método de descarga de iOS:** Escanee el código QR para descargar la aplicación APP

Adaptarse a los requisitos de la plataforma

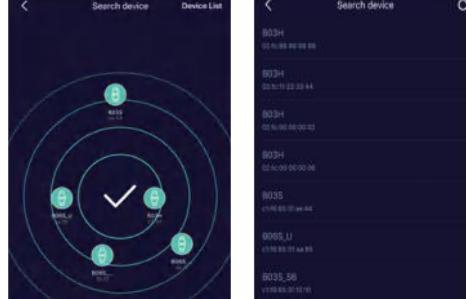

- Android 5.0 y teléfonos móviles superiores
- iOS 9.0 y teléfonos móviles superiores
- Compatible con Bluetooth BT4.0.
