### 3. Automatic Image Adjustment

The projector will automatically adjust the image for optimal clarity upon powering on.

**Tip:** If the initial auto-focus doesn't achieve desired results, you can manually adjust. Please see the 'TROUBLESHOOTING' section for more information.

#### 4. Activate Your Smart Projector

Follow on-screen setup instructions to activate your projector.

**Tip:** You will need an internet connection to activate your projector.

#### Important

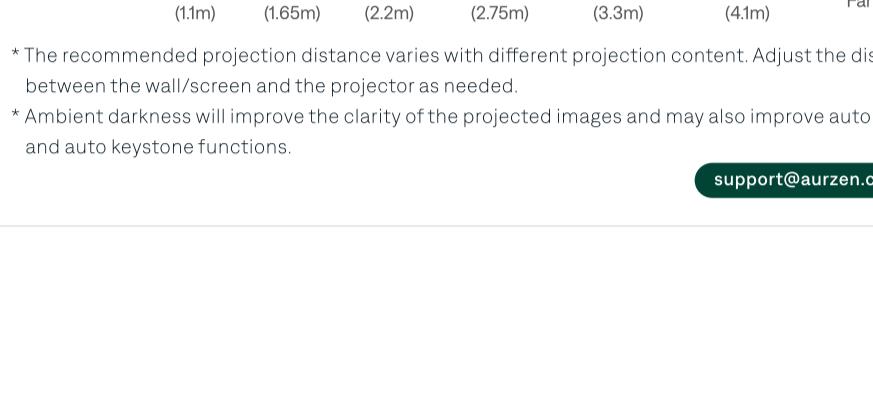

Roku never charges for activation.

#### Setup is done, congratulations!

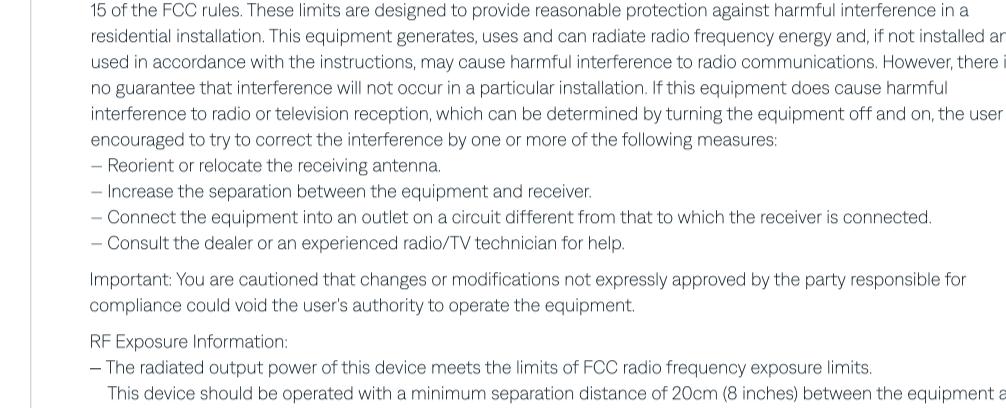

Congratulations! You're ready to personalize your Home screen, channel line-up, stream movies, and so much more.

### 1. What should I do if the image is not rectangular?

**Auto Keystone Correction:** Go to Home > Settings > Projector Settings and select Start auto-keystone.

**Manual Keystone Correction:** Go to Home > Settings > Projector settings > Image correction > Manual keystone and follow the on-screen instructions to adjust the image using four-point correction.

**4. How to install the Remote Control Mobile App?**

The app allows you to use your mobile device as a full-functioning remote control with voice search & keyboard.

1. Download the Roku app to your phone or tablet through Google Play™ or Apple App Store™.

2. Open the app and log in with your Roku account.

3. Follow the on-screen prompts and you're on your way!

**5. How to connect to a wireless network (DHCP)?**

\* Select the correct wireless network name and verify the password entered is correct.

\* Select the correct IP address assigned to the device by your wireless provider (wireless phones, baby monitors, etc.).

\* Reboot the router by disconnecting the power for more than 2 minutes and reconnect.

**6. Cannot complete auto-focus or auto-keyboard?**

**Auto-focus:** Make sure the projector is located in an area with no obstacles in front of the lens.

**Auto-keyboard:** Make sure the projector is located in an area with no obstacles in front of the lens.

**7. Auto-focus and auto-keyboard not working?**

Try adjusting the distance between the projector and the screen.

If the issue persists, power off the projector, then turn it back on and try again.

### 1. Safety Information

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

**RF Exposure Information:** The maximum power of this device meets the limits of FCC radio frequency exposure limits.

This device should be operated with a minimum separation distance of 20cm (8 inches) between the equipment and a person's body.

**Canada compliance statement:** Conformité réglementaire canadienne.

This device complies with Innovation, Science and Economic Development Canada license-exempt RSS standard.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

**CE statement:** Exposure to radio frequency energy.
