HOW CLICKNSEYOO™ VIDEO DOOR PHONE WORK?

1. A visitor presses ,after "Ding Dong" , and talks to housemaster via door phone.
2. Housemaster talks with visitor by pushing

Tips: If there is no action/sound detected for 10 seconds, sleeping mode of door phone would be on.

2 WAYS OF MOUNTING DOOR PHONE

Way 1 : Install mounting bracket with screws.

Way 2 : Install mounting bracket with adhesive tape

WIRE-FREE DIY SETUP IN A MINUTE

Step 1: Install with rechargeable battery and fully charge until the indicator light off

Step 3: Stick the mounting bracket with adhesive tape to the wall

Step 2: Suggest to mount door phone 4 feet above the ground

Step 4: Attach your door phone to the mounting bracket.

HOW TO INSTALL WIRED DOOR PHONE

Installation must be carried out by a qualified electrician. Refer to your local laws and building codes before performing electrical work; permits plus professional installation may be required by law. For your safety, only use an existing doorbell transformer **within 5-30V**. Using incompatible power sources can damage your device and cause electric shock.

Step 1 : Turn off power at consumer unit

Step 2. Mark the screwholes.

Step 3: Install the mounting bracket.

Step 4 : Connect the wires to +ve & -v & -ve power terminal

Step 5: Attach door phone to the mounting bracket.

CAUTION! Switch off the power before install

Safety Instructions

please read and follow the instructions below prior to using this product.

1. This product is not a toy do not allow children to play with it.
2. Strangulation Hazard: please keep the cords away from children for at least 3 feet/ 1 meter, in order to avoid strangling and choking
3. Do not place the baby monitor inside or near the crib or playpen. Always place this product out of children's reach (at least 3 feet/1 meter away).
4. Avoid exposure to direct sunlight and any nearby heaters.
5. Do not use or place the product near water, for example, next to the bathtub, sink, laundry machine, shower, swimming pool, or any other liquid-based containers.
6. Use the adaptor provided in the package or the standard adaptor with correct polarity and voltage (Input: 100-240V 50/60 H20.2A; Output: 5V ...1000mA).
7. Only use the charging cables included in the package, do not use other unofficial third-party cable to charge the unit. This might result in overheating and/or electronic component damage.
8. Only use the included rechargeable battery for the baby monitor, do not replace it with other batteries. Do not disassemble, squeeze, heat or throw it into the fire.
9. Do not overload the wall outlet or use an extension cord.
10. Do not place this product on any unstable surfaces or objects.
11. Always unplug the baby monitor from the wall outlet and power source when used.
12. Do not insert any sharp or metal objects into the plug contacts. This might cause electric shock.
13. Unplug the product from the power supply before cleaning. Do not use any liquid aerosol cleaners. Use a dry cloth to clean only.
14. Avoid spilling any liquid into this product.
15. This product is specifically designed for baby care and is not a replacement for adult supervision.
16. This product is not designed as a medical device.
17. Always test the baby monitor and check the reception status after changing its setup location. The signal of product may be affected by the wall thickness and other devices in the room using 2.4Ghz frequency (e.g. router, WIFI, laptop, etc.)
18. If the baby monitor is not properly functioning, please contact the customer service team as soon as possible in order to resolve the issues.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

FCCID: 2BEHY-CLICKNS

ISED Statement

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions: This device may not cause interference. This device must accept any interference, including interference that may cause undesired operation of the device. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement. L'appareil a été évalué pour répondre aux exigences générales d'exposition aux RF. L'appareil peut être utilisé dans des conditions d'exposition portable sans restriction.
