

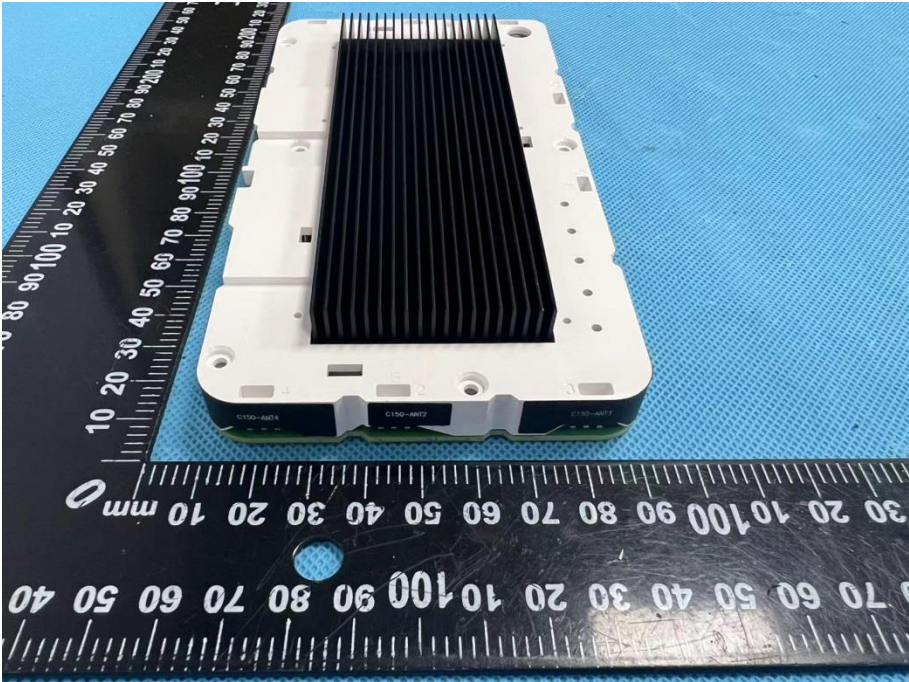

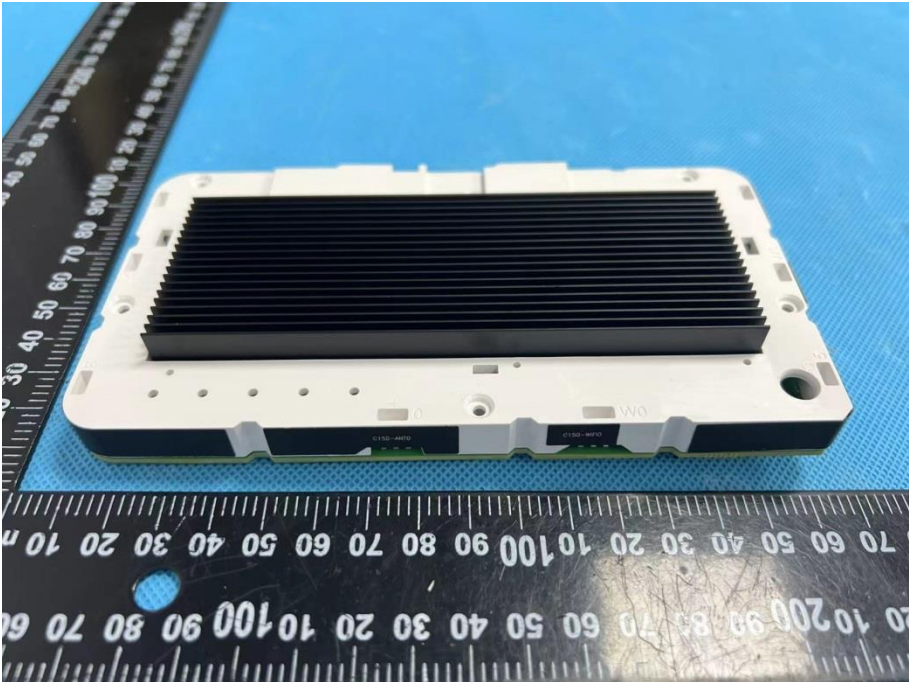

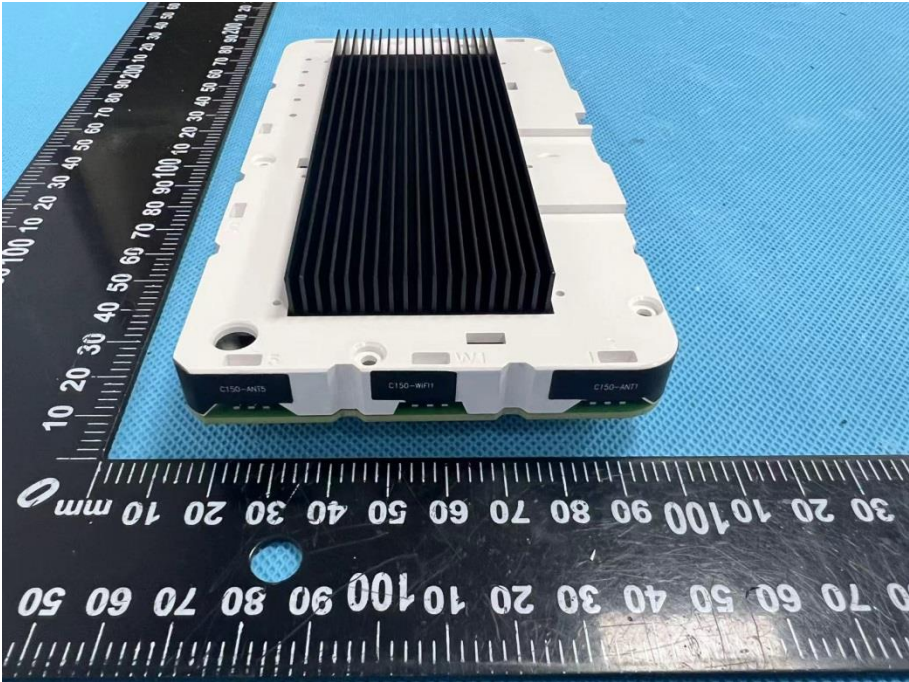

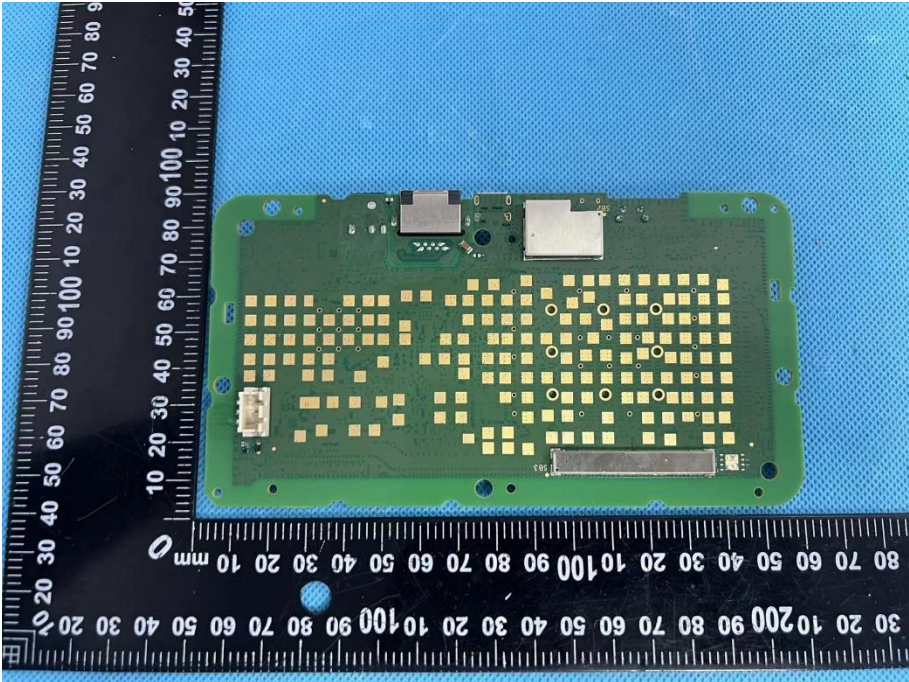

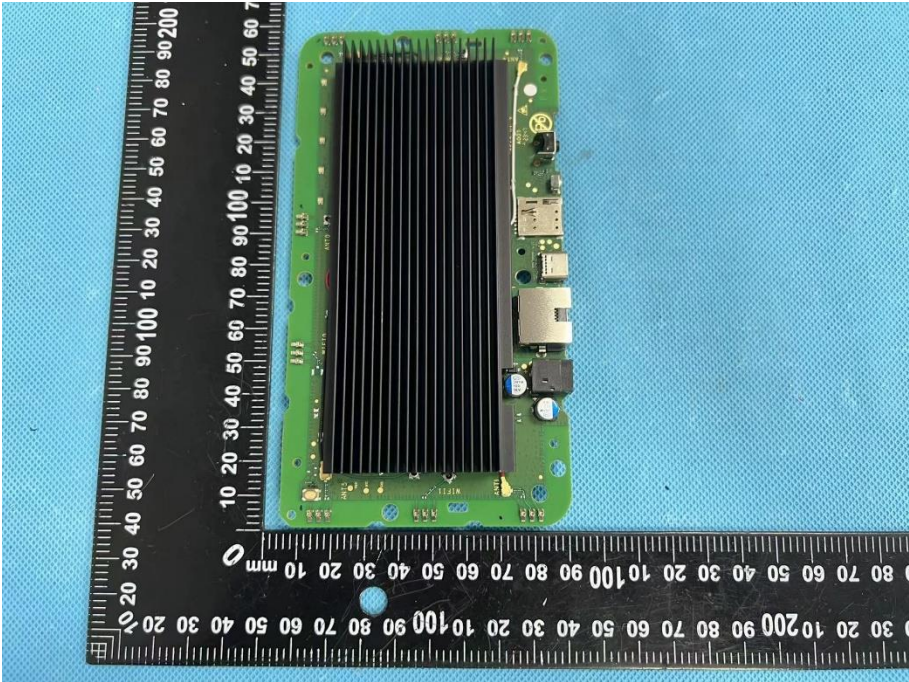

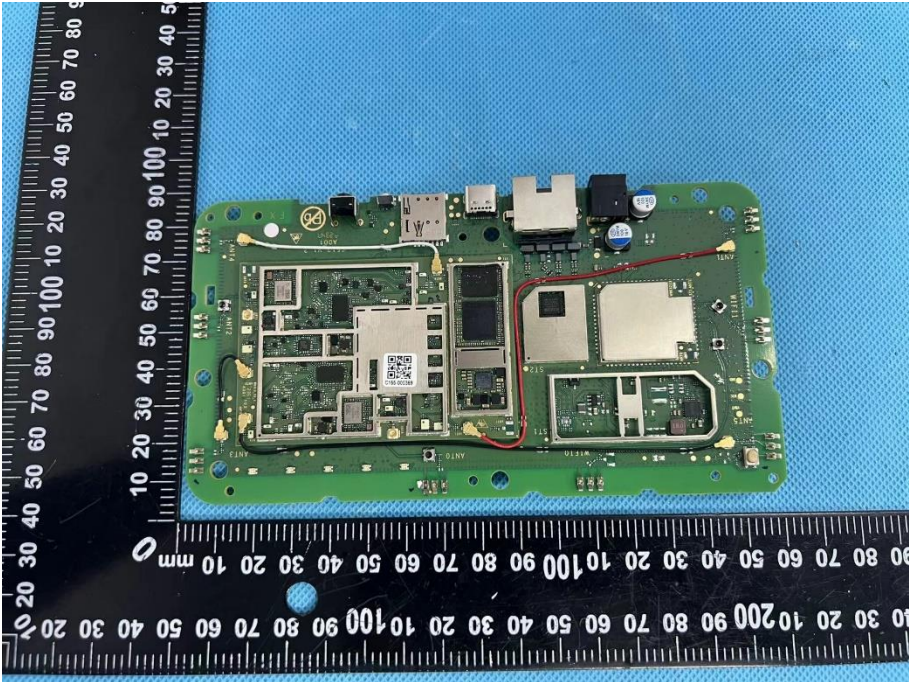

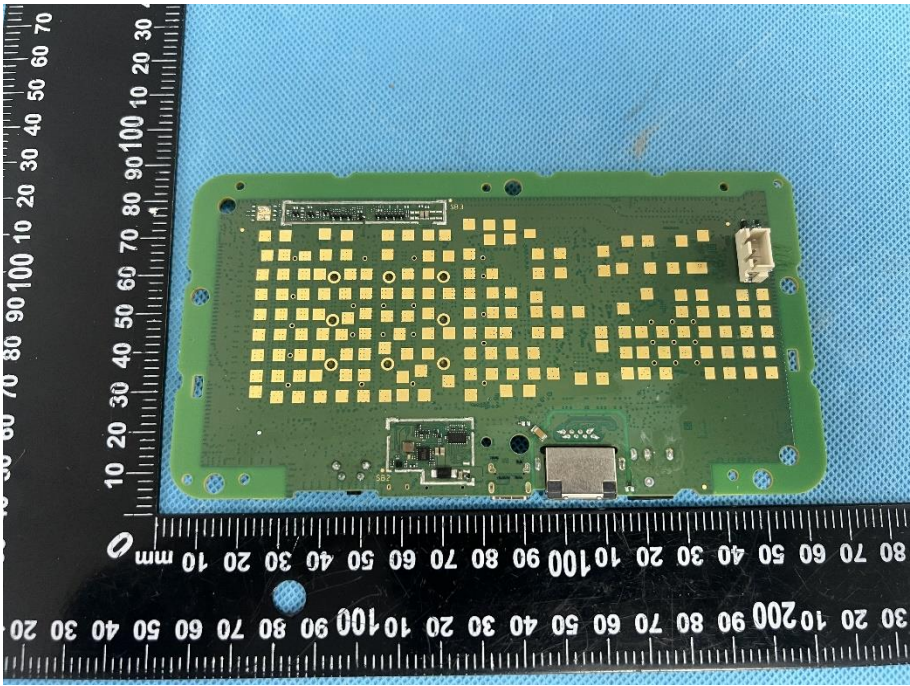

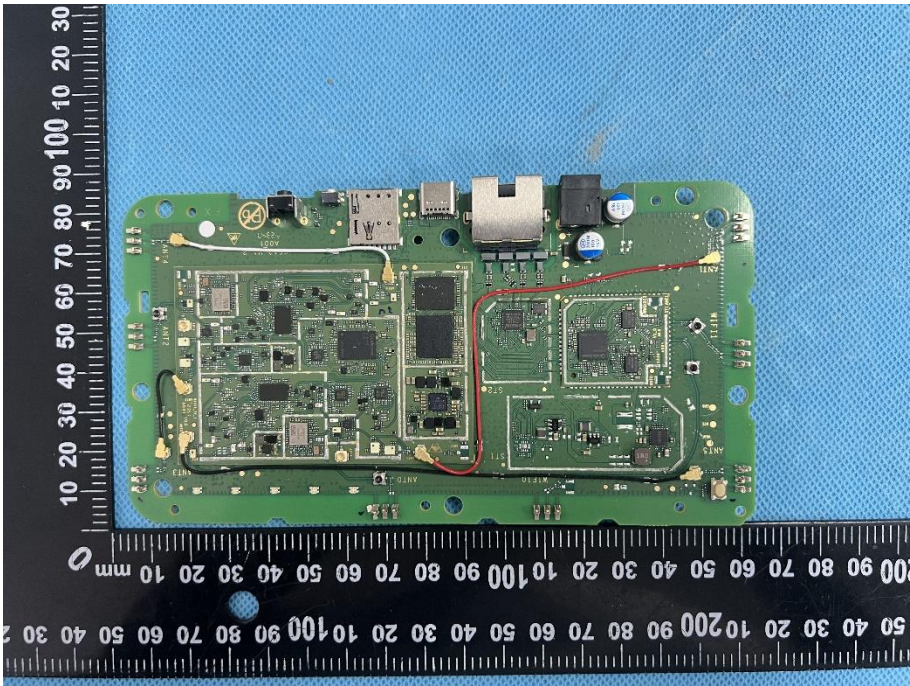

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the internal components of the EUT housing. On the left is a green printed circuit board (PCB) with a grid of gold-colored pads and various electronic components. To the right is the black plastic housing, which has a rectangular cutout in the center. Both items are placed on a blue surface next to a black ruler with white markings for scale.
EUT Housing and Board View 2	 This photograph shows the internal components of the EUT housing from a different perspective. A blue battery is visible in the center, with its label showing technical specifications and a barcode. To the right is the black plastic housing, which has a rectangular cutout in the center. Both items are placed on a blue surface next to a black ruler with white markings for scale.

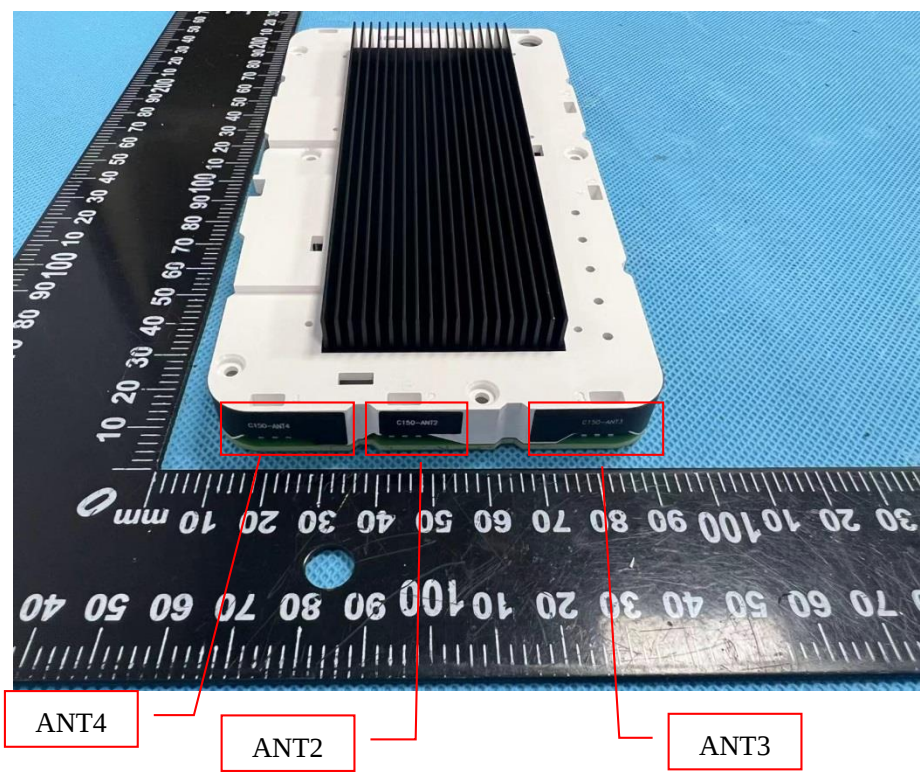

Solder Board-Component View 1	 A photograph of a white rectangular solder board component with a black heat sink in the center. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component has several small holes and a green solder mask on the bottom edge.
Solder Board-Component View 2	 A photograph of the same white rectangular solder board component from a different angle, showing the top surface. The black heat sink is prominent. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component has several small holes and a green solder mask on the bottom edge.

Solder Board-Component View 3	 A photograph showing the top view of a white plastic component with a black heat sink. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component has three labels: "C150-ANT5", "C150-WIFI", and "C150-ANT7".
Solder Board-Component View 4	 A photograph showing the bottom view of a green printed circuit board (PCB) with a grid of gold-colored solder pads. The PCB is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has several components, including a small white connector on the left and a larger silver component on the right.

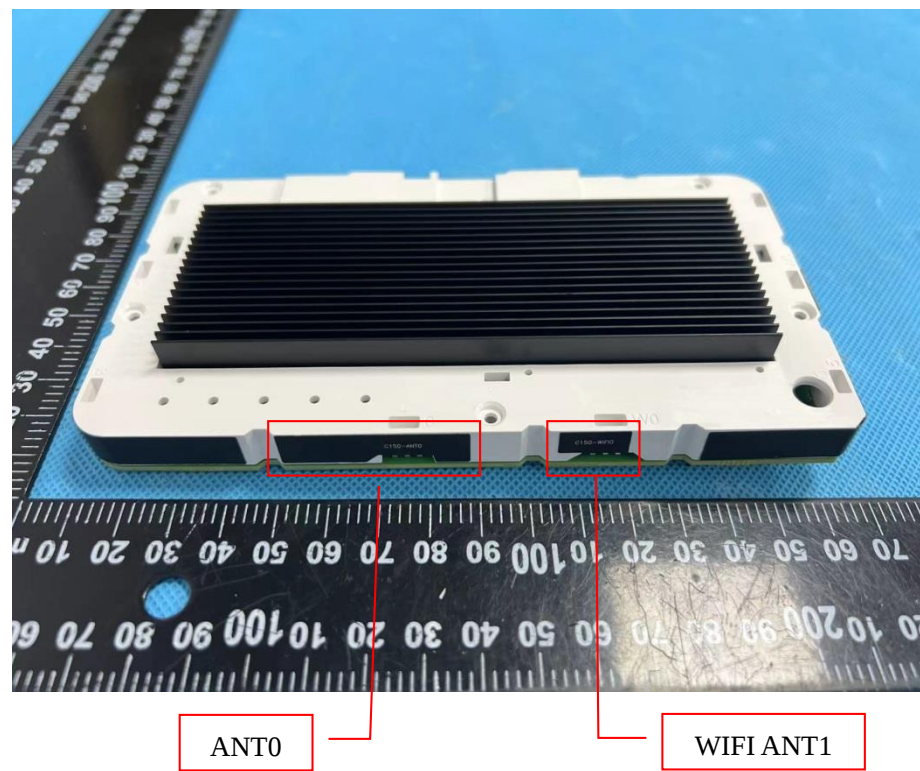

Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, likely a heat sink or thermal interface material, mounted on a blue textured surface. The component is rectangular with a large, dark, rectangular area in the center. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the 0 mm mark at the top and the 100 mm mark at the bottom. The component's width is approximately 100 mm, and its height is approximately 60 mm.
Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) component, likely a heat sink or thermal interface material, mounted on a blue textured surface. The component is rectangular with a large, dark, rectangular area in the center. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the 0 mm mark at the top and the 100 mm mark at the bottom. The component's width is approximately 100 mm, and its height is approximately 60 mm.

Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) with a grid of yellow solder pads. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board has a small white component on the right side and a small black component on the left side.
Solder Board-Component View 8	 A photograph of a green printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board features a large central chip, several smaller chips, and various passive components like capacitors and resistors. A red wire is connected to one of the components.
